REPORT
ON THE
GRAIN TRADE OF CANADA

For the Crop Year ended August 31
and to the close of Navigation

1918

(Prepared in collaboration with the Board of Grain Commissioners, Canada)

OTTAWA
J. de LABROQUERIE TACHÉ
PRINTER TO THE KING'S MOST EXCELLENT MAJESTY
1919

For the eastern division approximately the same facts are known; only here, in addition to the hold-over from the previous year and the crop of the current year, there are the large streams flowing in from the West already noted. This is treated as another pool of grain in the same manner as the western, the streams leading both in and out being traced, and the amount in the pool at the beginning and end of the period being measured.

There are certain radical differences between the West and the East. In the East no record as to the amount of the commercial grain is available from inspections, nor from movement through country elevators. The only evidence as to the amount of strictly eastern commercial grain is found by subtracting the movements into the pool from the amount milled therein and the amount shipped out. In the case of rough grains, milling figures are lacking for the crop year as yet, although it is hoped to have them for next year. Another striking difference between the commerce of the two divisions is that whereas the bulk of the grain of the West moves through terminals, at lake head, the movement in the East is distributed through a number of centers. It has been possible to show the movement through these ports in considerable detail.

One fact which it has been attempted to bring out clearly is the monthly utilization of the capacity of the various classes of elevators as shown in the data already currently published in the visible supplies in store. These data show the absence of that regular flow of traffic which will give the lowest costs for transportation and storage and at the same time ensure the highest price in the foreign grain markets.

Many details have been included which it is thought will be of value to students of the trade; in succeeding annual reports it is hoped to improve upon these beginnings.

An analytical table of contents will assist in showing the plan according to which details are presented and will aid in guiding the reader to the information for which he may be in search.

R. H. COATS,
Dominion Statistician.

DOMINION BUREAU OF STATISTICS,
OTTAWA, February 15, 1919.

MOVEMENT OF CANADIAN WHEAT, CROP YEAR 1917-18.

The accompanying map is inserted to describe graphically the movements of Canadian Wheat into the principal channels of consumption within the country and towards our export market.

It has been impossible to portray all the details of movement within the country and the expedient has been adopted of showing a pool for the Western Inspection Division and another pool for the Eastern Inspection Division, and showing the principal streams into and out of each of these pools for the year, also the movements through the chief grain centres of the country.

The Western pool, of course, is fed chiefly by the crop in the Western Division. This was computed for the crop year under discussion to be 212,612,000 bushels. There also was on hand at the beginning of the year, in accordance with the closest calculations available, some 5,267,000 bushels. The only other stream entering this pool is the small amount of 52,000 bushels entering from the United States. This makes a total flow into this pool during the year of 217,932,000 bushels. Of this, 169,104,000 bushels was used commercially, that is, shipped out of the division or milled within the division. Of this, 43,800,000 bushels are estimated to have been ground in the west. The Balance Sheet of wheat in Statement No. 37, shows the destination of the quantity shipped out of this pool and the map shows the movements east distinguishing between what went to the terminals at Fort William and Port Arthur and what was shipped all rail to the east. In addition to this amount disposed of commercially, it is estimated that 28,289,000 bushels were used for seed and that 589,000 bushels were held over in store to the next crop year.

7,798,000 bushels are shown as going straight through to the east by rail, either destined to the eastern division or to the east of the United States. It has been impossible, at this stage of the flow, to distinguish between what was re-shipped from the eastern pool and what was shipped through eastern Canada to United States, consequently, this has all been shown as going into the eastern the pool, and the shipments by rail through the eastern division into the United States have all been shown as shipments out of the eastern pool. The largest shipment out of the west went by way of the terminals, Fort William and Port Arthur. 115,227,000 bushels are reported to have passed into the public and

private terminal elevators at Fort William and Port Arthur during the crop year. No attempt has been made to show the quantities on hand at these terminals beginning with the end of the crop year as distinguished from the quantity on hand in the division as a whole, on the map. Consequently, the streams shown as shipments from the terminals do not exactly agree in amount to the quantity shown as received at these terminals. 14,703,000 bushels were shipped eastward from these cities by rail and, being joined to the rail shipments from the far west, make the total rail shipments east of 22,501,000 bushels. This figure is the most exact that it has been found possible to ascertain for this crop year and, judging from all collateral evidence at hand, is very close to the exact facts of the situation. It is hoped that for the succeeding crop years, we may have an indisputable record of such rail shipments. The water shipments from the terminals are known to a high degree of exactness, and amounted for this year to 99,730,000 bushels. In addition to this 489,626 bushels were shipped eastward by water from Duluth of Canadian Wheat. Of these total lake shipments, 35,943,000 bushels entered the Bay Port elevators and, owing to the bay port elevators being more thoroughly cleared of their supplies at the end of the year than at the beginning, 36,423,000 bushels were forwarded thence by rail. 7,208,000 bushels from the lake stream were received at Goderich and forwarded thence by rail. 16,686,000 bushels were taken from this lake stream at Port Colborne of which 9,565,000 bushels were shown as forwarded by rail into the eastern pool. However, to be exact, a large part of this was milled in the city of Port Colborne. It being impossible to show the amount milled at each centre, this has been shown as going into the eastern pool, and the figures are shown in one total. Of this wheat received at Port Colborne, 7,129,000 bushels were forwarded down through Lake Ontario, part of which was received at the Kingston elevator, being forwarded thence again to Montreal.

A large part of the movement down the lakes went to United States ports, by far the largest portion of this being 39,088,000 bushels received at Buffalo. Detroit received 511,000 bushels, Erie 305,000, Fairport 678,000, Ogdensburg 57,000, Port Huron 441,000 and Toledo 114,000 bushels. These smaller streams have not been shown on the map. Of this total movement into the United States Ports from Fort William and Port Arthur 3,200,000 were shown by the Canadian Customs records to have been cleared for consumption in the United States.

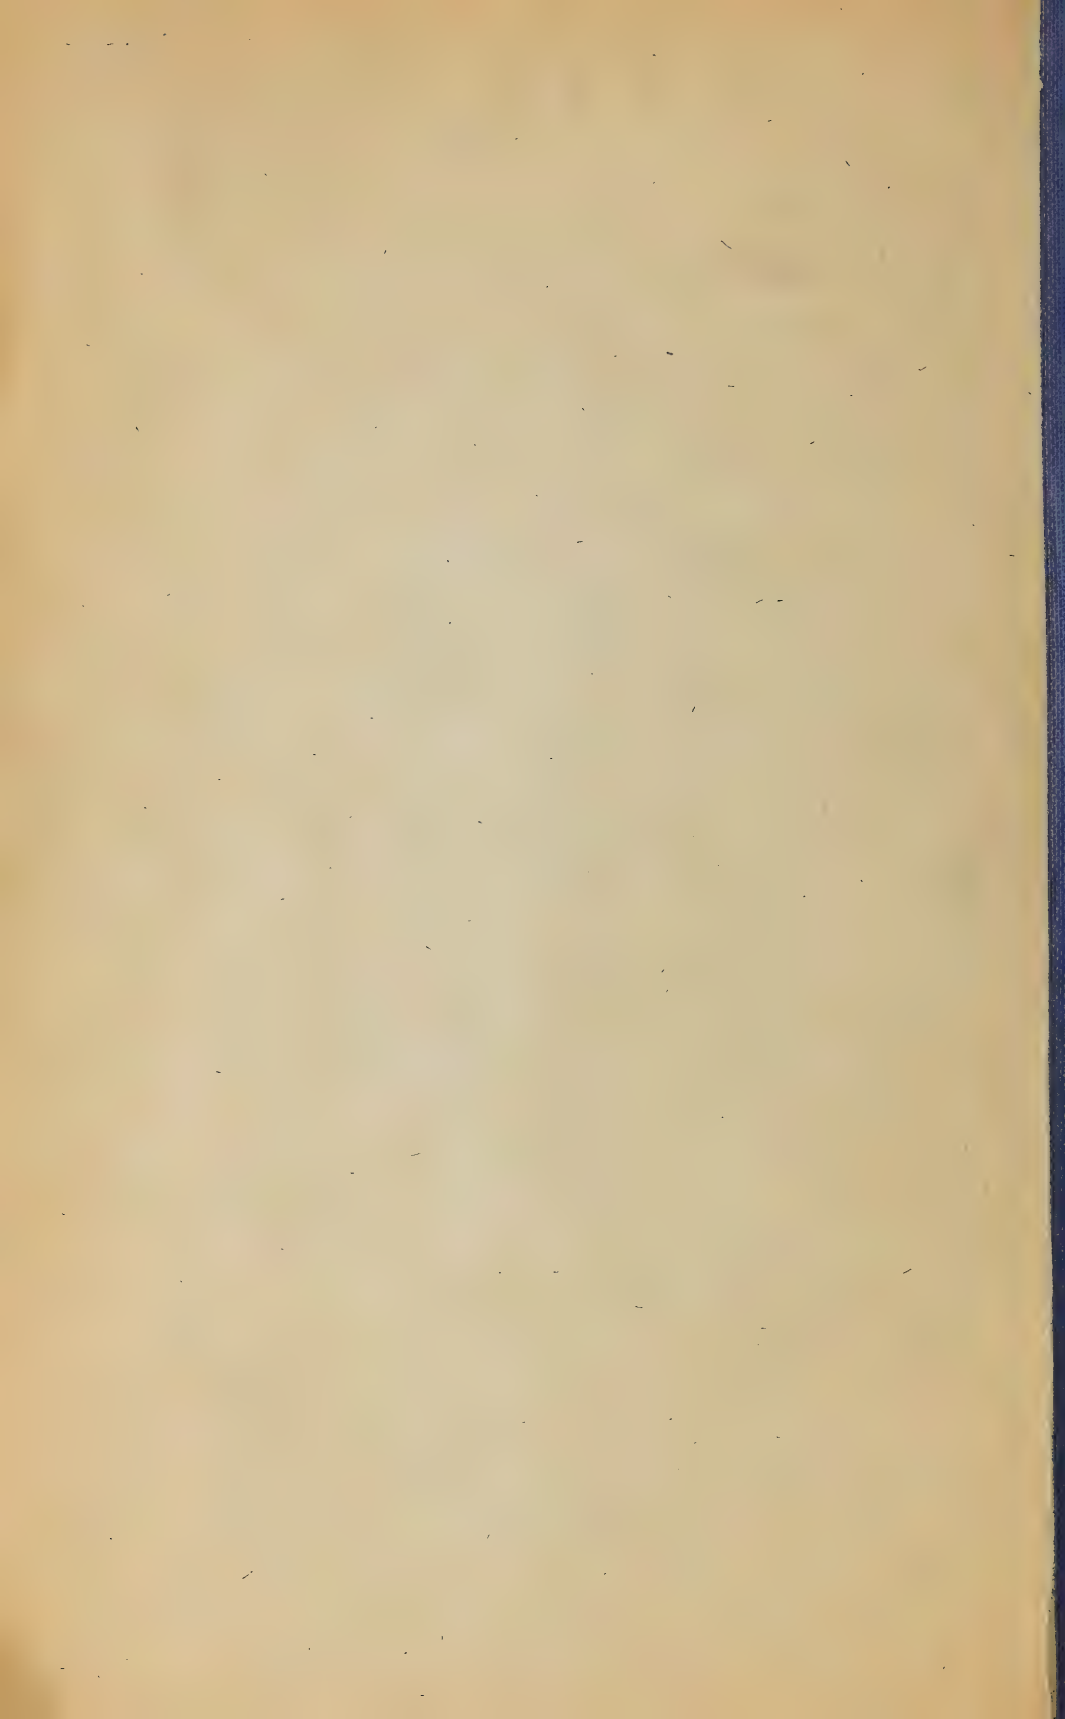

The eastern pool received during the year not only the crop that was estimated at 21,130,000 bushels, but also the shipments from the west, amounting in all to 82,185,000 bushels. The route by which the various parts of this stream entered have already been sketched, excepting that in addition it is necessary to explain the off-shoot from the main railway stream of 20,752,000 bushels into Montreal. This amount, plus the 7,929,000 bushels shipped down the St. Lawrence by water, was received in the public elevators situated in the City of Montreal. This, being such a large stream, has been shown separately before it enters the main eastern pool. In addition to the crops and the receipts from the west, the map shows 3,536,000 bushels as received into the pool for the year from the quantity on hand at the end of the previous year. There also was a small importation from the United States into this division, amounting to 129,000 bushels.

The movements out of this year's eastern pool included 2,855,000 bushels carried over in store into the following year, 2,000,000 bushels used for seed in the division, 42,200,000 milled, 14,652,000 bushels shipped out for export from the St. Lawrence ports, 3,498,000 shipped out by way of Halifax, and 12,918,000 shipped out by way of St. John. The deductions from the Customs reports show that 26,798,000 bushels were shipped out via the United States to other countries. In addition there was a small amount of 280,000 bushels cleared for United States consumption, making the total shipments by rail from the east into the United States, 27,078,000 bushels.

Two main streams are shown as going into the United States mainly for re-shipment to other foreign countries. Of this 39,088,000 bushels went by way of Buffalo and 27,078,000 bushels by rail from the eastern pool. In addition 2,105,000 bushels went out via other United States lake ports. 3,200,000 bushels of the lake shipments were cleared for consumption in the United States, and 280,000 bushels from the shipments from the east. The remaining 65,306,000 bushels were cleared for export to other countries via the United States by rail from the eastern pool. No attempt has been made to show by what ports this wheat moved out of the United States, the map indicating merely that it went via United States Atlantic ports. So far as our export is concerned, it is correct to conclude that this was exported into other countries by way of United States ports. It so happens that a considerable portion of this, while billed to other countries than the United States when leaving our boundaries, was taken by The United States Grain Corporation under specific agreement with the Canadian Government and ground into flour in the United States. In part this flour was exported and in part American wheat was substituted for Canadian wheat bushel for bushel. The Canadian official records do not show the amount of such grinding and substitution and, consequently, we have shown the movements as though it were all exported direct. In fact, to all intents and purposes, in so far as Canadian commerce is concerned, this wheat was sold for consumption in other countries than the United States.

This heavy movement of 65,306,000 bushels through United States ports as compared with 31,068,000 bushels by way of Canadian ports is a very significant matter for Canadian Commerce.

The Balance Sheets in Statements numbers 37, 38 and 39 show the movements of all kinds of grain into and out of the year's pool for each division and for Canada as a whole, and the Balance sheets for the Public Terminal Elevators, Interior Terminal Elevators, and Public Elevators in the East, show the annual movement through each particular grain centre in Canada. Those wishing to study this more detailed movement for wheat and the full movement of other grains are referred to these balance sheets.

GRAIN STATISTICS, 1919.

PREFACE.

The present report on the Grain Trade of Canada is issued by the Internal Trade Division of the Dominion Bureau of Statistics in collaboration with the Board of Grain Commissioners.

The report as a whole has been prepared by W. Dougan under the supervision of R. J. McFall, Ph.D., as chief of the Division of Internal Trade Statistics.

The object of the report is to assemble the more important grain statistics in one volume as a handbook for the grain trade. It will be observed that the volume has been enlarged and now deals comprehensively with grain production and trade both in Canada and other countries.

The first part of the volume shows the movement of the grain in detail, the production, inspection, and handlings at country, interior terminal, public terminal, private terminal elevators in the west and at public elevators in the east, of Canadian grain, and of United States grain at eastern elevators.

As stated in the previous report, the country is divided into two main areas, Eastern and Western. The movement is given both by a balance sheet and graphically by charts for wheat, oats and barley. An outstanding feature which might be drawn to the attention of the reader is the comparative increase over the previous year of the flow through Canadian channels over those of the United States.

The future prices of oats, barley and flax are shown by weeks at Duluth and Winnipeg. Daily cash prices are also shown at Winnipeg.

A new feature has been introduced into the report in the statements of the grain ground and the products produced therefrom by the mills in the eastern and western divisions.

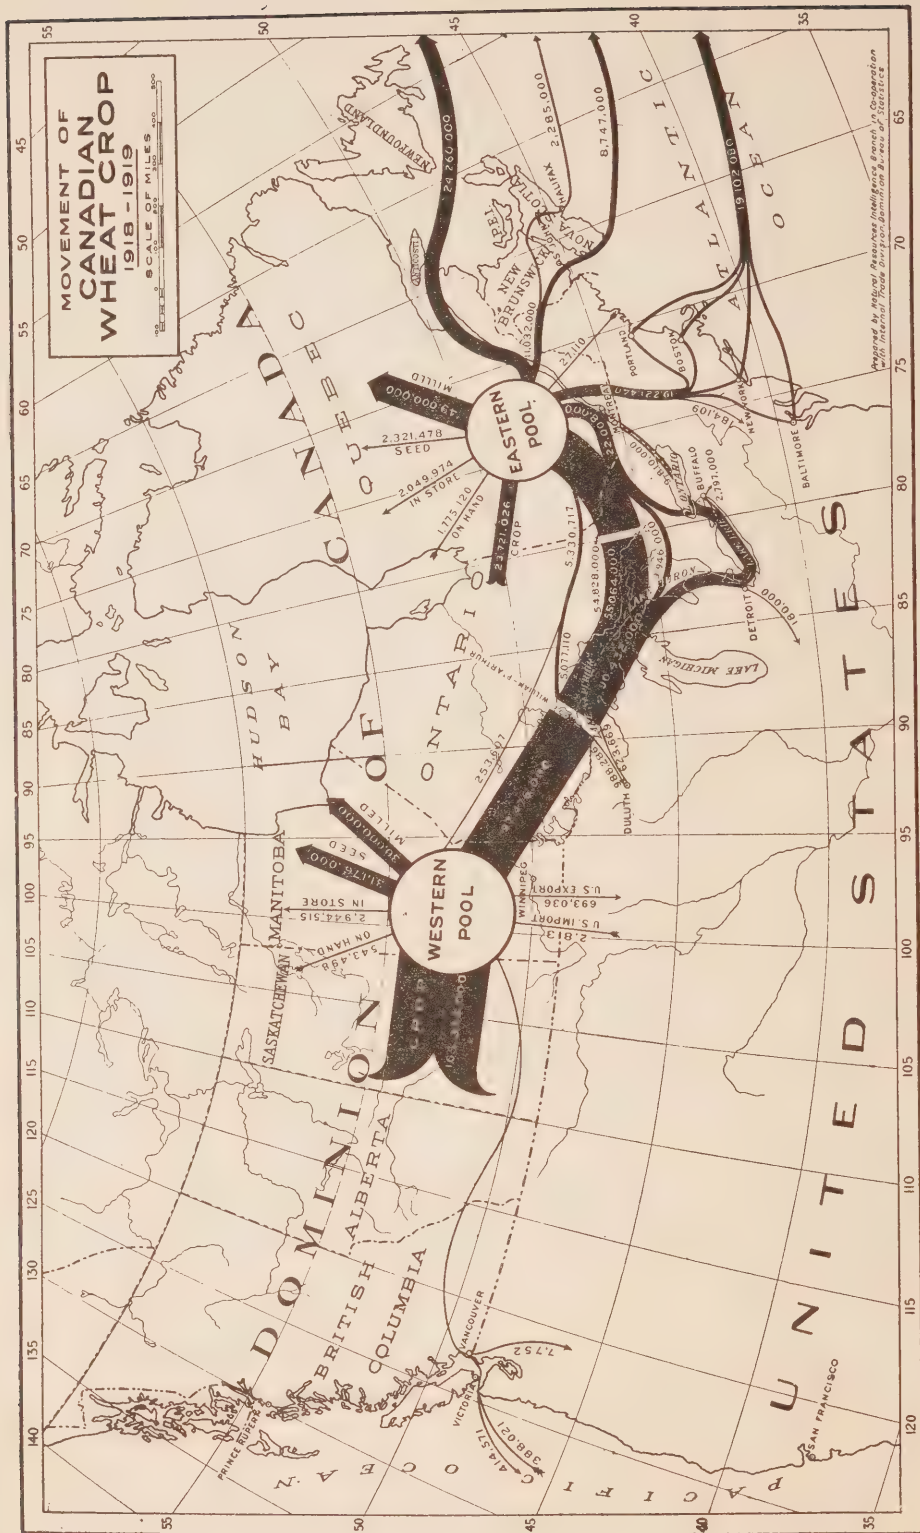

The second part of the report deals with international trade extensively. This is felt to be most important in view of Canada's paramount interest in the export market. The production, imports and exports of wheat, and also of wheat flour, oats, barley, rye, and corn, are shown for all important countries, and summaries are given for the chief commercial nations. These data should prove valuable to those engaged in the export of grain from Canada and to every one interested in the vital problem of Canada's relation to the world's grain market.

A very important portion of the data has been supplied by E. A. Ursell, Statistician of the Board of Grain Commissioners. The data on International Trade are based upon the statistics of the International Institute of Agriculture and other sources.

R. H. COATS,
Dominion Statistician.

MOVEMENT OF CANADIAN WHEAT, CROP YEAR 1918-19.

The accompanying map is inserted to describe graphically the movements of Canadian wheat into the principal channels of consumption within the country and towards our export market.

It has been impossible to portray all the details of movement within the country and the expedient has been adopted to showing a pool for the Western Inspection Division and another pool for the Eastern Inspection Division, and showing the principal streams into and out of each of these pools for the year, also the movements through the chief grain centres of the country.

The western pool, of course, is fed chiefly by the crop in the Western Division. This was computed for the crop year under discussion to be 165,354,324 bushels. There also was on hand at the beginning of the year, in accordance with the closest calculations available, some 543,498 bushels. The only other stream entering this pool is the small amount of 390,834 bushels, of which 338,081 bushels entered from Australia via Vancouver, B.C.; the balance of 2,813 bushels were imported from United States. 321,760 bushels of this amount were reshipped to Great Britain and other countries; 92,811 bushels of Canadian wheat were also exported over seas while 7,752 bushels were exported direct by rail to United States. This makes a total flow into this pool during the year of 166,288,656 bushels. Of this, 126,472,238 bushels were used commercially, that is, shipped out of the division or milled within the division. Of this, 30,000,000 bushels were ground in the west. The balance sheet of wheat in statement No. 39, shows the destination of the quantity shipped out of this pool, and the map shows the movements east distinguishing between what went to the terminals at Fort William and Port Arthur and what was shipped all rail to the east. In addition to this amount disposed of commercially, it is estimated that 31,175,861 bushels were used for seed and that 2,944,515 bushels were held over in store to the next crop year.

253,607 bushels are shown as going straight through to the east by rail, either destined to the Eastern Division or to the eastern part of the United States. It has been impossible, at this stage of the flow, to distinguish between what was reshipped from the eastern pool and what was shipped through Eastern Canada to United States; consequently, this has all been shown as going into the eastern pool, and the shipments by rail through the Eastern Division into the United States have all been shown as shipments out of the eastern pool. The largest shipment out of the west went by way of the terminals, Fort William and Port Arthur. 97,476,240 bushels passed into the public and private terminal elevators at Fort William and Port Arthur during the crop year. No attempt has been made to show the quantities on hand at these terminals beginning with the end of the crop year as distinguished from the quantity on hand in the division as a whole, on the map. Consequently, the streams shown as shipments from the terminals do not exactly agree in amount to the quantity shown as received at these terminals. 5,077,110 bushels were shipped eastward from these cities by rail and, being joined to the rail shipments from the far west, make the total rail shipments east of 5,330,717 bushels. The water shipments from the terminals are known to a high degree of exactness, and amounted for this year to 90,431,782 bushels. In addition to this 623,669 bushels of Canadian wheat were shipped eastward by water from Duluth. Of these total lake shipments, 55,063,871 bushels entered the bay port elevators and, owing to the bay port elevators being more thoroughly cleared of their supplies at the beginning of

the year than at the end, 54,828,236 bushels were forwarded thence by rail. 9,946,811 bushels from the lake stream were received at Goderich and forwarded thence by rail; 20,246,806 bushels were taken from this lake stream at Port Colborne, of which 11,186,548 bushels were shown as forwarded by rail into the eastern pool. However, to be exact, a large part of this was milled in the city of Port Colborne. It being impossible to show the amount milled at each centre, this has been shown as going into the eastern pool, and the figures are shown in one total. Of this wheat received at Port Colborne, 9,809,758 bushels were forwarded down through lake Ontario, the large part of which was received at the Kingston elevator, being forwarded thence again to Montreal.

Some 988,286 bushels were shipped from Fort William and Port Arthur to Duluth-Superior, 623,669 bushels went to Canadian ports from these aforesaid ports. Of the movement down the lakes to United States ports, some 2,797,037 bushels were received at Buffalo, Detroit received 121,673 bushels, Duluth-Superior 988,286 bushels, Port Huron 58,000 bushels. The smaller streams have not been shown on the map.

The eastern pool received during the year not only the crop that was estimated at 23,721,026 bushels, but also the shipments from the west, amounting in all to 91,777,413 bushels. The route by which the various parts of this stream entered have already been sketched, excepting that in addition it is necessary to explain the offshoot from the main railway stream of 22,008,127 bushels in Montreal. This amount, plus the 9,809,758 bushels shipped down the St. Lawrence by water, was received in the public elevators situated in the city of Montreal. This, being such a large stream, has been shown separately before it enters the main eastern pool. In addition to the crops and the receipts from the west, the map shows 1,775,120 bushels as received into the pool for the year from the quantity on hand at the end of the previous year. There also was a small importation from the United States into this division, amounting to 27,110 bushels.

The movements out of this year's eastern pool included 2,049,974 bushels carried over in store into the following year, 2,321,478 bushels used for seed in the division, 49,000,000 milled, 24,259,739 bushels shipped out for export from the St. Lawrence ports, 2,284,538 shipped out by way of Halifax, and 8,747,114 shipped out by way of St. John. The deductions from the Customs reports show that 19,037,331 bushels were shipped out via the United States to other countries. In addition there was a small amount of 184,109 bushels cleared for United States consumption, making the total shipments by rail from the east into the United States, 19,221,440 bushels.

Two main streams are shown as going into the United States. Of these 2,797,037 bushels went by way of Buffalo and 1,167,959 bushels via other United States lake ports, and 19,037,331 bushels moved by rail from the eastern pool, while 184,109 bushels were cleared for consumption in the United States from the shipments from the east, and 3,964,996 bushels from the shipments to lake ports, including Duluth. Thus 19,102,080 bushels were cleared for export to other countries via the United States from the eastern pool. No attempt has been made to show by what ports this wheat moved out of the United States. the map indicating merely that it went via United States Atlantic ports. So far as our export is concerned, it is correct to conclude that this was exported into other countries by way of United States ports.

This very light movement of 19,102,080 bushels of wheat through United States ports as compared with some 35,392,931 bushels via Canadian ports including Vancouver speaks volumes for the future of the Canadian channel of export trade. No doubt the threatened United States embargo in Canadian wheat has

something to do with this large movement via Canadian ports. However, when the depth of Welland canal has increased so the large boats can come down as far as Kingston, larger movements via these ports may be looked for in the future.

The balance sheets in statements Nos. 39, 40 and 41 show the movements of all kinds of grain into and out of the year's pool for each division and for Canada as a whole, and the balance sheets for the public terminal elevators, interior terminal elevators, and public elevators in the east, show the annual movement through each particular grain centre in Canada. Those wishing to study more this detailed movement for wheat and the full movement of other grains are referred to these balance sheets, the export and other commercial movements of these coarse grains being of relative unimportance as compared with their local consumption.

MOVEMENT OF CANADIAN OATS, CROP YEAR 1918-19.

The crop in the western division was computed for the crop year under discussion to be 224,004,758 bushels. There also was on hand at the beginning of the year, in accordance with the closest calculations available, some 7,679,214 bushels. The only other stream entering this pool is the small amount of 11,100 bushels entering from the United States. This makes a total flow into this pool during the year of 231,695,072 bushels. Of this, only 17,070,147 bushels were used commercially, that is, shipped out of the division or milled within the division. Of this, 4,000,000 bushels are estimated to have been ground in the west. The balance sheet of oats in statement No. 39 shows the destination of the quantity shipped out of this pool and the map shows the movements east distinguishing between what went to the terminals at Fort William and Port Arthur and what was shipped all rail to the east. In addition to this amount disposed of commercially, it is estimated that 23,899,110 bushels were used for seed and that 6,719,742 bushels were held over in store to the next crop year.

Seven hundred and twenty-six thousand five hundred and sixty bushels are shown as going straight through to the east by rail, either destined to the Eastern Division or to the east of the United States. It has been impossible, at this stage of the flow, to distinguish between what was reshipped from the eastern pool and what was shipped through Eastern Canada to United States, consequently, this has all been shown as going into the eastern pool, and the shipments by rail through the Eastern Division into the United States have all been shown as shipments out of the eastern pool. The largest shipment out of the west went by way of the terminals, Fort William and Port Arthur. 12,863,928 bushels are reported to have passed into the public and private terminal elevators at Fort William and Port Arthur during the crop year. No attempt has been made to show the quantities on hand at these terminals beginning with the end of the crop year as distinguished from the quantity on hand in the division as a whole, on the map. Consequently, the streams shown as shipments from the terminals do not exactly agree in amount to the quantity shown as received at these terminals. 5,873,684 bushels were shipped eastward from these cities by rail and, being joined to the rail shipments from the far west, make the total rail shipments east of 6,600,244 bushels. The water shipments from the terminals are known to a high degree of exactness and amounted for this year to 6,582,906 bushels. In addition to this, 298,000 bushels were shipped eastward by water from Duluth of Canadian oats. Of these total lake shipments

1,805,771 bushels entered the bay port elevators and, owing to the bay port elevators being more thoroughly cleared of their supplies at the beginning of the year than at the end, 1,741,786 bushels were forwarded thence by rail. 2,005,357 bushels from the lake stream were received at Goderich and forwarded thence by rail. 352,935 bushels were taken from this port stream at Port Colborne. Of the oats received at Port Colborne, 1,223,512 bushels were forwarded down through lake Ontario, part of which was received at the Kingston elevator and forwarded thence again to Montreal. A small amount of oats moved down the lakes to United States ports, Buffalo being the only port to receive anything, viz., 1,406,419.

The eastern pool received during the year not only the crop that was estimated at 202,307,742 bushels, but also the shipments from the west, amounting in all to 11,348,171 bushels. The route by which the various parts of this stream entered have already been sketched, excepting that in addition it is necessary to explain the off-shoot from the main railway stream of 2,875,709 bushels into Montreal. This amount, plus the 1,223,512 bushels shipped down the St. Lawrence by water, was received in the public elevators situated in the city of Montreal. This being such a large stream, has been shown separately before it enters the main eastern pool. In addition to the crops and the receipts from the west, the map shows 6,584,693 bushels as received into the pool for the year from the quantity on hand at the end of the previous year. There also was a large importation from the United States into this division, amounting to 4,693,287 bushels.

The movements out of this year's eastern pool included 12,652,429 bushels carried over in store into the following year, 13,593,727 bushels used for seed in the division, 5,100,000 milled, 1,243,973 bushels shipped out for export from the St. Lawrence ports, and 19,280 bushels shipped out by way of St. John. The deductions from the Customs reports show that 10,246,749 bushels were shipped out via United States to other countries. In addition there was a small amount of 447,377 bushels cleared for United States consumption, making the total shipments by rail from the east into the United States, 10,694,126 bushels.

Two main streams are shown as going into the United States. 1,406,419 bushels went by way of Buffalo and 10,246,749 bushels moved by rail from the eastern pool. 447,377 bushels were cleared for consumption in the United States from the shipments in the east. The remaining 10,996,254 bushels were cleared for export to other countries via United States by rail from the eastern pool. No attempt has been made to show by what ports this oats moved out of the United States, the map indicating merely that it went via United States Atlantic ports.

This heavy movement of 10,996,254 bushels through United States ports as compared with 1,263,253 bushels by way of Canadian ports is a very significant matter for Canadian Commerce.

The balance sheets in statements Nos. 39, 40 and 41 show the movements of all kinds of grain into and out of the year's pool for each division and for Canada as a whole, and the balance sheets for the public terminal elevators in the east, show the annual movement through each particular grain centre in Canada. Those wishing to study this more detailed movement for oats and the full movement of other grains are referred to these balance sheets.

The most striking thing in connection with oats is the small quantity exported as compared with the number of bushels produced.

PRODUCTION.

TABLE No. 1.—Detailed Historical Survey of Grain* Crops in Canada.

FALL WHEAT.

Crop Year	Acreage harvested.	Average Yield per Acre.	Production.	Weight per measured Bushel.	Average Farm Price per Bushel.	Farm value.	Winnipeg cash price per Bushel.				Domestic exports including flour, fiscal year beginning April 1 of indicated year.	Per cent of Crop exported.

Importing Countries include: Germany, Austria-Hungary, Belgium, Denmark, Spain, France, Great Britain and Ireland, Italy, Netherlands, Sweden, Switzerland, Canada.

HARVEST TIMES OF THE WORLD.

The following shows the month of the Wheat harvest in the Wheat-growing sections of the world:—

January.....	Australia, New Zealand and Chili.
February and March.....	East India, Upper Egypt.
April.....	Lower Egypt, Syria, Cyprus, Persia, Asia Minor, India, Mexico and Cuba.
May.....	Algeria, Central Asia, China, Japan, Morocco, Texas and Florida.
June.....	Turkey, Greece, Italy, Spain, Portugal, south of France, California, Louisiana, Mississippi, Alabama, Georgia, Carolinas, Tennessee, Virginia, Kentucky, Kansas, Arkansas, Utah, Missouri.
July.....	Roumania, Bulgaria, Austro-Hungary, south of Russia, Germany, Switzerland, France, south of England, Oregon, Nebraska, Minnesota, Wisconsin, Colorado, Washington, Iowa, Illinois, Indiana, Michigan, Ohio, New York, New England and Eastern Canada.
August.....	Belgium, Holland, Great Britain, Denmark, Poland, Colombia, North and South Dakota, Western Canada.
September and October.....	Scotland, Sweden, Norway and north of Russia.
November.....	Peru, South Africa and Argentina.
December.....	Burmah and Argentina.

GRAIN STATISTICS 1920

PREFACE

The present report on the Grain Trade of Canada is issued by the Internal Trade Branch of the Dominion Bureau of Statistics in collaboration with the Board of Grain Commissioners for Canada.

The report as a whole has been prepared by W. Dougan under the supervision of F. J. Horning, Chief of the Internal Trade Branch of the Bureau.

The object of the report is to assemble the more important statistical data relating to the grain trade in one volume. Statistics are presented showing in detail the various channels and markets through which the grain passes from the farm to its final disposition. Comparative data are included for other countries than Canada.

The first part of the report deals with the domestic movement of grain in detail—the production, inspection and handlings at country, interior terminal, public terminal and private terminal elevators in the West and at public elevators in the East, including handlings of United States grain in the eastern elevators. As stated in previous reports, Canada is divided into two divisions for the marketing of grain, the Western and the Eastern, the dividing line being at Port Arthur and Fort William, which are included in the western field.

Tables have been added in the present report showing the exports of grain from Canada by Customs ports of exit, and countries of destination.

Monthly average cash prices of wheat, oats, and barley at Winnipeg are shown for the last four years by chart. Average future options on oats, barley, flax and rye at Winnipeg, Minneapolis, and Chicago are tabulated. During the crop year 1919–1920, the marketing of wheat was under the control of the Canadian Wheat Board and wheat futures were not dealt in.

An important portion of the data has been supplied by E. A. Ursell, Statistician of the Board of Grain Commissioners. The data relating to the International Grain Trade are based upon the statistics of the International Institute of Agriculture and other sources.

R. H. COATS,
Dominion Statistician.

MOVEMENT OF CANADIAN WHEAT, CROP YEAR 1919-20.

The accompanying map is inserted to describe graphically the movements of Canadian wheat into the principal channels of consumption within the country and towards our export markets.

It has been impossible to portray all the details of movement within the country and the expedient has been adopted to showing a pool for the Western Inspection Division and another pool for the Eastern Inspection Division, and showing the principal streams into and out of each of these pools for the year, as well as the movements through the chief grain centres of the country.

The Western pool, of course, is fed chiefly by the crop in the Western Division. This was computed for the crop year under discussion to be 166,622,469 bushels. There also was on hand at the beginning of the year, in accordance with the closest calculations available, some 2,944,515 bushels. The only other stream entering this pool is the small amount of 53,995 bushels (of which 26,055 bushels were imported at Vancouver, B.C.). This makes a total flow into this pool during the year of 169,629,979 bushels. Of this, 134,908,865 bushels were used commercially, that is shipped out of the division or milled within the division. Of this, 32,000,000 bushels were estimated to be ground in the west for home consumption, while 6,269,274 bushels were exported as flour. The summary of wheat in statement No. 51 shows the destination of the quantity shipped out of this pool, and the map shows the movements east distinguishing between what went to the terminals at Fort William and Port Arthur and what was shipped all rail to the east. In addition, to this amount disposed of commercially, it is estimated that 29,557,225 bushels were used for seed and that 4,215,711 bushels were held over in store to the next crop year.

Eighty-nine thousand, two hundred and forty-four bushels are shown as going straight through to the east by rail, either destined to the Eastern Division or to the eastern part of the United States. It has been impossible, at this stage of the flow, to distinguish between what was reshipped from the eastern pool and what was shipped through Eastern Canada to United States. Consequently, this has all been shown as going into the eastern pool and the shipments by rail through the Eastern Division into the United States have been shown as shipments out of the eastern pool. The largest shipment out of the west went by the way of the terminals Fort William and Port Arthur. 92,665,646 bushels passed into the public and private terminal elevators at Fort William and Port Arthur during the crop year. No attempt has been made to show on the map the quantities on hand at these terminals beginning with the end of the previous crop year as distinguished from the quantity on hand in the division as a whole. As a result, the streams shown as shipments from the terminals do not exactly agree in amount to the quantity shown as received at these terminals. 13,478,174 bushels were shipped eastward from these cities by rail, and, being joined to the rail shipments from the west, make the total rail shipments east of 13,567,418 bushels. The water shipments from the terminals are known to a high degree of exactness, and amounted for this year to 80,803,960 bushels. In addition to this, 840,525 bushels of Canadian wheat were shipped eastward by water from Duluth. Of these total lake shipments, 49,631,784 bushels entered the bay port elevators and, owing to the bay port elevators being more thoroughly cleared of their supplies at the beginning of the year than at the end, 48,247,434 bushels were forwarded thence by rail. 9,256,766 bushels from the lake stream were received at Goderich and forwarded thence by rail; 19,507,833 bushels were taken from this lake stream at Port Colborne, of which 4,681,547 bushels were shown as forwarded by rail into the eastern pool. However, to be exact,

a large part of this was milled in the city of Port Colborne. It being impossible to show the amount milled at each centre, this has been shown as going into the eastern pool, and the figures are shown in one total. Of this wheat received at Port Colborne, 10,176,805 bushels were forwarded down through Lake Ontario, the large part of which was received at Montreal.

Some 975,264 bushels were shipped from Winnipeg by rail to Duluth-Superior, 801,083 bushels went to Canadian ports, and 39,442 bushels to Buffalo from these aforesaid ports. Of the movement down the lakes to United States ports, some 300,443 bushels were received at Buffalo, Chicago 50,000 bushels, Port Huron 1,016,944 bushels. The smaller streams have not been shown on the map.

The eastern pool received during the year not only the crop that was estimated at 26,637,931 bushels, but also shipments from the west, amounting in all to 93,805,074 bushels. The route by which the various parts of this stream entered have already been sketched. In addition, it is necessary to explain the offshoot from the main railway stream of 33,059,435 bushels in Montreal. This amount, plus the 10,176,805 bushels shipped down the St. Lawrence by water, was received in the public elevators situated in the city of Montreal. This, being such a large stream, has been shown separately before it enters the main eastern pool. In addition to the crops and the receipts from the west, the map shows 2,670,774 bushels as received into the pool for the year from the quantity on hand at the end of the previous year. There also was a small importation from the United States into this division, amounting to 61,484 bushels.

The movements out of this year's eastern pool included 5,096,900 bushels carried over in store into the following year, 2,349,429 bushels used for seed in the division, 26,000,000 milled for consumption, 32,158,336 bushels shipped out for export from the St. Lawrence ports, 2,224,754, 18,807,822 for export shipped out by way of Halifax, and 13,626,542 shipped out by way of St. John. The deductions from the Customs reports show that 13,023,281 bushels were shipped out via the United States to other countries. In addition there was a small amount of 147,499 bushels cleared for United States consumption, making the total shipments by rail from the east into the United States, 13,170,780 bushels.

Two main streams are shown as going into the United States. Of these 339,885 bushels went by way of Buffalo and 1,066,944 bushels via other United States lake ports, and 13,170,780 bushels moved by rail from the eastern pool, while 147,499 bushels were cleared for consumption in the United States from the shipments from the east, and 1,367,387 bushels from the shipments to lake ports, including Duluth. Thus 13,023,281 bushels were cleared for export to other countries via the United States from the eastern pool. No attempt has been made to show by what ports this wheat moved out of the United States, the map indicating merely that it went via United States Atlantic ports. So far as our export is concerned, it is correct to conclude that this was exported into other countries by way of United States ports.

Attention is drawn to the very light movement of 13,023,281 bushels of wheat through United States ports as compared with 48,345,771 bushels via Canadian ports. It will be remembered that the marketing of wheat during the crop year 1919-20 was under the control of the Canadian Wheat Board. During a large part of this time an embargo was also in force against the movement of Canadian wheat and wheat products over United States railways owing to the congested condition of transportation facilities and the large crop to be marketed from the United States.

The summaries in statements Nos. 51, 52 and 53, show the movements of all kinds of grain into and out of the year's pool for each division and for Canada as a whole, and the summaries for the public terminal elevators, interior terminal elevators, and public elevators in the east, show the annual movement through

each particular grain centre in Canada. Those wishing to make a more detailed study of the movement of wheat and other grains are referred to these summaries, the export and other commercial movements of these coarse grains being of relative unimportance as compared with their local consumption.

MOVEMENT OF CANADIAN OATS CROP YEAR, 1919-20.

The crop in the Western Division was computed for the crop year 1919-20 to be 238,030,881 bushels. There also was on hand at the beginning of the year some 6,719,742 bushels. The only other stream entering this pool is the small amount of 5,026 bushels imported from the United States. This makes a total flow into the pool during the year of 244,755,649 bushels. Of this, 46,227,230 bushels were used for commercial purposes, that is, shipped out of the division or milled within the division. 5,553,846 bushels are estimated as being milled for consumption and 451,497 bushels for export. The summary regarding oats in statement No. 51 shows the destination of the quantity shipped out of this pool and the map shows the movements east distinguishing between all rail shipments to the east and shipments via the terminals at Fort William and Port Arthur. In addition to this amount disposed of commercially, it is estimated that 25,322,327 bushels were used for seed and that 5,772,529 bushels were held over in store to the next crop year.

Three million, five hundred and forty-six thousand, four hundred and thirty-three bushels are shown as going straight through to the east by rail, either destined to the Eastern Division or to the eastern portion of the United States. It has been impossible, at this stage of the flow, to distinguish between what was reshipped from the eastern pool and what was shipped through Eastern Canada to United States. Consequently, this has all been shown as going into the eastern pool, and the shipments by rail through the Eastern Division into the United States have all been shown as shipments out of the eastern pool. The largest shipment out of the west went by way of the terminals, Fort William and Port Arthur. 25,156,871 bushels are reported to have passed into the public and private terminal elevators at Fort William and Port Arthur during the crop year. No attempt has been made to show on the map the quantities on hand at these terminals beginning with the end of the previous crop year as distinguished from the quantity on hand in the division as a whole. The streams shown as shipments from the terminals, therefore, do not exactly agree in amount with the quantity shown as received at these terminals. 14,637,707 bushels were shipped eastward from these cities by rail, and, being joined to the rail shipments from the west, make total rail shipments east of 18,184,140 bushels. The water shipments from the terminals are known to a high degree of exactness and amounted for this year to 16,395,132 bushels. In addition, 5,777 bushels were shipped from Winnipeg to Duluth, while 68,649 went by way of Vancouver, B.C. Of these total lake shipments, 6,288,995 bushels entered the bay port elevators and, owing to the bay port elevators being more thoroughly cleared of their supplies at the end of the year than at the beginning, 6,387,483 bushels were forwarded thence by rail. 3,216,939 bushels from the lake stream were received at Goderich and forwarded thence by rail. 367,681 bushels were taken from this port stream at Port Colborne. Of the oats received at Port Colborne, 2,437,945 bushels were forwarded down through lake Ontario, part of which was received at Montreal. A quantity of oats moved down the lakes to United States ports, Buffalo receiving 4,960,938 bushels and Chicago 418,213 bushels.

The eastern pool received during the year not only the crop that was estimated at 156,356,119 bushels, but also shipments from the west, amounting in all to 29,200,121 bushels. The route by which the various parts of this stream

entered have already been sketched. As in the case of wheat, an off-shoot from the main railway stream shows 2,883,276 bushels shipped into Montreal by rail. This amount, plus the 2,437,945 bushels shipped down the St. Lawrence by water, was received in the public elevators situated in the city of Montreal. This being such a large stream, has been shown separately before it enters the main eastern pool. In addition to the crops and the receipts from the west, the map shows 12,652,429 bushels as received into the pool for the year from the quantity on hand at the end of the previous year. There also was an importation from the United States into this division, amounting to 1,914,799 bushels.

The movements out of this year's eastern pool included 4,175,174 bushels carried over in store into the following year, 14,302,493 bushels used for seed in the division, 2,615,257 bushels milled for consumption, 1,354,488 bushels milled for export, 2,447,251 bushels shipped out for export from the St. Lawrence ports, and 330,999 bushels shipped out by way of St. John, 416,662 bushels by Halifax, 67,157 bushels by Charlottetown, 85,619 bushels by Sydney, 140 bushels by Lunenburg. The deductions from the Customs reports show that 5,802,538 bushels were shipped out via United States to other countries. In addition, there was an amount of 2,304,406 bushels cleared for United States consumption, making the total shipments by rail from the east into the United States, 8,106,944 bushels.

Two main streams are shown as going into the United States. 4,960,938 bushels went by way of Buffalo and 8,106,944 bushels moved by rail from the eastern pool. 2,304,406 bushels were cleared for consumption in the United States from the shipments in the east. The remaining 5,802,538 bushels were cleared for export to other countries via United States by rail from the eastern pool. No attempt has been made to show by what ports these oats moved out of the United States, the map indicating merely that it went via United States Atlantic ports.

During the crop year under discussion the export of oats through the United States ports dropped from 10,996,254 bushels to 5,802,538 bushels, as compared with an increase from 1,263,253 bushels to 3,427,156 bushels in the movement through Canadian ports.

The summaries in statements Nos. 51, 52 and 53, show the movements of all kinds of grain into and out of the year's pool for each division and for Canada as a whole, and the summaries for the public terminal elevators in the east show the annual movement through each particular grain centre in Canada. Those wishing to study the movement of oats and of other grains in more detail are referred to these summaries.

The most striking thing in connection with oats is the small quantity exported as compared with the number of bushels produced.

PRODUCTION

TABLE No. 1.—Survey of Grain Crops in Canada, 1916-1920.

FALL WHEAT

Crop of	Acreage harvested	Average Yield per Acre	Production	Weight per measured Bushel	Average Farm Price per Bushel	Farm value	Winnipeg cash price per Bushel				Domestic exports including flour, fiscal year beginning April 1 of indicated year	Per cent of Crop exported.
							In November		In May

GRAIN STATISTICS, 1921.

PREFACE

The present report on the Grain Trade of Canada is issued by the Internal Trade Branch of the Dominion Bureau of Statistics in collaboration with the Board of Grain Commissioners for Canada and is the fourth of its series.

The report has been prepared by W. Dougan under the supervision of F. J. Horning, Chief of the Internal Trade Branch of the Bureau.

Statistics are presented showing in detail the various channels and markets through which the grain passes from the farm to its final disposition. Comparative data are also included for other countries than Canada.

The first part of the report deals with the domestic movement of grain—the production, inspection, and handlings at country, interior terminal, public terminal and private terminal elevators in the Western Inspection Division, (comprising Fort William and Port Arthur and all points west thereof) and at public elevators in the East, including handlings of United States grain in the eastern elevators.

Tables have been added in the present report showing the origin of the grain at country elevators by railway sub-divisions and loadings over platforms. More comprehensive data have also been compiled showing the rail movement of grain to the head of the lakes and the all-rail movement to the East. Further tables have been included showing the export movement of wheat and wheat flour by shipping routes and by United States as well as by Canadian Atlantic ports.

Records of cash prices of wheat and other grains are shown for Winnipeg and Toronto with comparative figures for United States and British markets. Average future options at Winnipeg, Minneapolis, Duluth and Chicago are tabulated in addition.

An important portion of the data has been supplied by E. A. Ursell, Statistician, of the Board of Grain Commissioners for Canada. The data relating to the International Grain Trade are based upon the statistics of the International Institute of Agriculture and other official sources.

R. H. COATS,

Dominion Statistician.

MOVEMENT OF CANADIAN WHEAT, CROP YEAR 1920-1921.

In order to throw into relief the main movement of Canadian wheat from the fields of the West and the East into the principal channels of consumption within the country and towards our export markets, the accompanying map has been prepared.

For purposes of the grain trade, Canada has been divided into two main inspection divisions, the Western and the Eastern, the dividing line falling just east of Port Arthur. These divisions are defined by section 12 of the Canada Grain Act, 1912.

It has been impossible to include all the details of the movement within the country and the expedient has been adopted of showing a pool for each division, with the principal streams into and out of each of these pools for the crop year, as well as the movements through the chief grain centres of the country.

The chief source of supply is, of course, the crop of the year, computed at 263,189,300 bushels, of which 235,059,827 bushels were produced in the Western Division. Stocks on hand at the beginning of the crop year amounted to 4,580,228 bushels and imports to 269,892 bushels. This makes the total flow into the Western pool for the crop year 239,909,947 bushels.

The quantity of wheat disposed of for commercial purposes in the Western division, that is, shipped out of the division or milled within the division, amounted to 187,998,634 bushels. Shipments out of the division amounted to 163,964,892 bushels, distributed as follows: exports to the United States, 46,272,438 bushels; exports to the United Kingdom and other countries, 37,717,742 bushels; shipments to the Eastern Inspection Division, 79,668,563 bushels. The quantity milled for consumption in Canada amounted to 21,404,712 bushels and 2,935,179 bushels were milled but exported in the form of flour.

In addition to the above amounts disposed of commercially, it is estimated that 38,900,860 bushels were retained for seed, and 5,257,073 bushels were carried over in store to the next crop year.

The primary movement of the wheat is, of course, from the farm to the inspection points and on to the public and private terminal elevators at Fort William and Port Arthur. Inspections amounted to 187,185,000 bushels and receipts at these elevators to 141,816,632 bushels. In addition 306,149 bushels were shipped by rail to the East without touching the head of the lakes (via Armstrong, Ont.). The rail shipments from Fort William and Port Arthur amounted to 17,897,997 bushels. These, with direct shipments other than those mentioned above, amounted to 24,013,837 bushels making a total shipment all rail out of the division of 24,319,986 bushels. The water movement from the head of the lakes is shown as 123,059,577 bushels, 55,270,869 bushels going to Canadian lake ports and 67,788,708 to United States points. Canadian wheat shipped from Duluth amounted to 687,374 bushels of which 77,708 bushels went to Port McNicoll, the balance, 609,366 bushels, going to United States ports.

Of the total lake shipments from Fort William and Port Arthur, 30,344,757 bushels entered Georgian Bay ports, rail shipments from which totalled 31,530,139 bushels. The bulk of these rail shipments no doubt found their destination in Montreal for export. Goderich elevators received 7,817,918 bushels by water and 395,832 bushels by rail. This was all shipped out by rail either in the form of wheat or of flour. Port Colborne elevators received 17,523,017 bushels by water and 553,848 bushels by rail, a total of 18,076,865 bushels. Of

this amount 12,011,597 bushels were shipped out by water; the rail shipments of 6,036,030 bushels from Port Colborne include grain milled by the Maple Leaf Milling Company at that point. 10,004,103 bushels were received at Montreal by water, of which quantity 880,639 bushels were direct shipments from the head of the lakes. Rail receipts amounted to 20,935,743 bushels making the total quantity of wheat handled at Montreal 30,939,846 bushels.

Shipments by water from Fort William and Port Arthur to United States Lake ports were as follows:—

Duluth-Superior.....	4,990,940	bushels.
Chicago.....	1,550,485	"
Detroit.....	411,440	"
Toledo.....	1,753,496	"
Cleveland.....	895,800	"
Buffalo.....	57,626,003	"
Other United States ports.....	560,544	"
Total.....	67,788,708	bushels.

Customs returns show that 37,251,394 bushels of wheat were exported billed direct from Fort William and Port Arthur to countries other than the United States via United States seaboard ports.

Total lake shipments show an increase from 80,803,960 bushels to 123,059,577, shipments to Canadian ports showing a decrease while shipments to United States ports increased.

Shipments from the Western Division into the Eastern pool amounted to 79,668,563 bushels as shown above. The eastern crop amounted to 28,129,473 bushels, while the quantity carried over from the previous year amounted to 5,267,363 bushels. Imports from the United States were 322,592 bushels making the total quantity entering the Eastern pool, 113,694,140 bushels.

Shipments out of the Eastern pool to the United States amounted to 2,941,113 bushels; to other countries, via Canadian seaboard ports 32,300,876 bushels; to other countries via United States ports 16,941,616 bushels; a total of 52,183,605 bushels. Mill grindings for domestic consumption were 18,074,160 bushels, for export 28,054,341 bushels, a total of 46,128,501 bushels. The total disposed of commercially was 98,312,106 bushels. Of the balance 1,806,282 bushels were required for seed purposes and the carry over at the end of the crop year amounted to 2,599,732 bushels.

The above exports of 32,300,876 bushels left Canada through the following ports:—

Montreal.....	25,784,118	bushels.
Quebec.....	41,186	"
Total—St. Lawrence ports.....	25,825,304	"
North Sydney, N.S.....	400	"
Halifax.....	333	"
St. John.....	6,474,839	"
	32,300,876	"

Other exports through Canadian points were as follows: via Vancouver, 466,329 bushels, from Dawson, 20 bushels, making a total export of 32,767,225 bushels of wheat passing through Canadian points.

Rail shipments from the Eastern Division to United States for consumption amounted to 2,941,113 bushels, and for re-export to other countries, 16,941,616 bushels, a total of 19,882,729 bushels. Of this amount 3,005,402 bushels left Canada through Ontario ports of exit, 13,917,750 bushels through Coaticook, P.Q., other Quebec inland ports of exit showing 18,464 bushels. Exports of Canadian wheat through Portland, Me., amounted to 13,883,449 bushels.

Total exports of wheat to United States for consumption amounted to 49,213,551 bushels. Exports to the United Kingdom and other overseas countries amounted to 86,960,235 bushels, 32,767,225 bushels being shipped via Canadian ports, while 54,193,010 bushels were shipped via United States ports. Total exports of wheat from Canada amounted to 136,173,786 bushels.

Comparative figures of export shipments overseas via Canadian and United States seaboard ports for other crop years are as follows:—

	Via Canadian Ports.	Via United States Ports.	Total.
1918-1919.....	35,292,000	19,102,080	54,394,080
1919-1920.....	48,345,771	13,023,281	61,369,052
1920-1921.....	32,767,225	54,193,010	86,960,235

The bulk of the exports of Canadian grain via United States ports during the crop year 1920-21 passed through New York. Other United States ports handled Canadian grain in the following order: Portland, Baltimore, Philadelphia and Boston. Detailed figures of this movement compiled from returns to the United States Bureau of Foreign and Domestic Commerce are shown in table 77. Owing to differences in the carry over and methods of compilation the amounts, however, do not exactly coincide with Canadian Customs returns.

Complete data showing the movement of wheat and other grains by inspection divisions and for Canada as a whole are contained in tables 71, 72 and 73. Summaries of the handling of grain by the different classes of elevators—country, interior terminal, public terminal, private terminal and public elevators in the East—show the movement through each particular grain centre in Canada during the crop year. Those wishing to make a more detailed study of the movement of wheat and other grains are referred to these summaries.

MOVEMENT OF CANADIAN OATS, CROP YEAR 1920-1921.

The crop of oats in the Western Division was computed for the crop year 1920-21 to be 316,418,280 bushels. The amount on hand at the beginning of the year was some 5,825,352 bushels. The only other stream entering the Western pool is the small amount of 3,666 bushels imported from the United States. This makes a total flow into the pool during the year of 322,247,298 bushels. Of this, 55,186,098 bushels were used for commercial purposes, that is, shipped out of the division or milled within the division. Shipments out of the division amounted to 49,657,772 bushels, distributed as follows: to the Eastern Inspection Division 44,076,446 bushels; exported to the United States 2,442,874 bushels; exported to the United Kingdom and other overseas countries 3,138,452 bushels. 5,528,326 bushels were ground in the West, 4,512,860 bushels for domestic consumption and 1,015,466 bushels for export. In addition to the quantity disposed of commercially it is estimated that 27,213,735 bushels were required for seed, and 23,653,459 were carried over in store to the next crop year.

Receipts of oats at the public and private terminal elevators at Fort William and Port Arthur were 50,302,399 bushels. Shipments were 45,299,610 bushels, 39,300,489 bushels were shipped by lake and 5,999,121 bushels by rail. In addition 3,866,072 bushels were shipped straight through to the East by rail, 882,522 bushels going via Armstrong, Ont., making a total rail movement from the Western Division to the East of 9,865,193 bushels.

Lake shipments to Canadian ports were 34,211,253 bushels. These with the rail shipments of 9,865,193 bushels make the total movement of 44,076,446 bushels of oats from the Western Inspection Division to the Eastern. No oats were shipped via Duluth. Exports by way of Vancouver, B.C., amounted to 8,085 bushels; via Prince Rupert, 29 bushels; and via Dawson, 600 bushels.

Of the total lake shipments to Canadian ports, 21,078,990 entered the Georgian Bay port elevators, from which 18,986,196 bushels were forwarded by rail. 4,606,460 bushels from the lake stream were received at Goderich, shipments by rail from these elevators being 4,055,284 bushels. Receipts at Port Colborne elevators, amounted to 4,586,225. Shipments from Port Colborne by water were 4,275,198 bushels and by rail 257,858 bushels, a total of 4,533,056 bushels. Water shipments from Port Colborne were mainly transshipments of grain en route to Montreal. 6,782,984 bushels were received by water at Montreal, including 2,283,209 bushels shipped direct from Fort William and Port Arthur. Rail receipts of oats at Montreal amounted to 17,279,348 bushels, making total receipts at Montreal of 24,062,332 bushels of oats. On account of the importance of these shipments to Montreal they are shown separately on the map before entering the main Eastern pool.

All oats shipped during this crop year by water from the head of the lakes to United States ports were destined to Buffalo. These amounted to 3,958,648 bushels.

Customs returns show that 3,129,738 bushels of oats were exported billed direct from Fort William and Port Arthur to countries other than the United States via United States seaboard ports.

The Eastern crop of oats was estimated at 214,291,420 bushels. Shipments from the West as above were 44,076,446 bushels. In addition to the crop of the year and shipments from the Western Division, 4,287,807 bushels were carried over from the previous year. There also was an importation from the United States into the Eastern Division of 1,017,435 bushels. Total quantity of oats entering the Eastern pool amounted to 263,673,108 bushels.

The movements out of this year's Eastern pool include 6,494,626 bushels milled for domestic consumption, 2,030,928 bushels milled for export, and export shipments from Montreal of 19,214,321 bushels, from St. John 1,282,722 bushels, from Halifax 471,541 bushels, from Charlottetown 39,254 bushels, from Sydney and North Sydney 50,954 bushels; 50 bushels were also shipped out through Amherst, N.S., making a total export shipment of 21,058,842 bushels through Canadian Atlantic seaboard ports.

Shipments to United States for consumption were 428,599 bushels and 1,645,715 bushels were shipped from the Eastern pool for export to other countries through United States ports, making the total shipments by rail from the East into United States 2,074,314 bushels.

Seed requirements in the East amount to 15,158,837 bushels and 19,120,264 bushels were carried over into the next crop year.

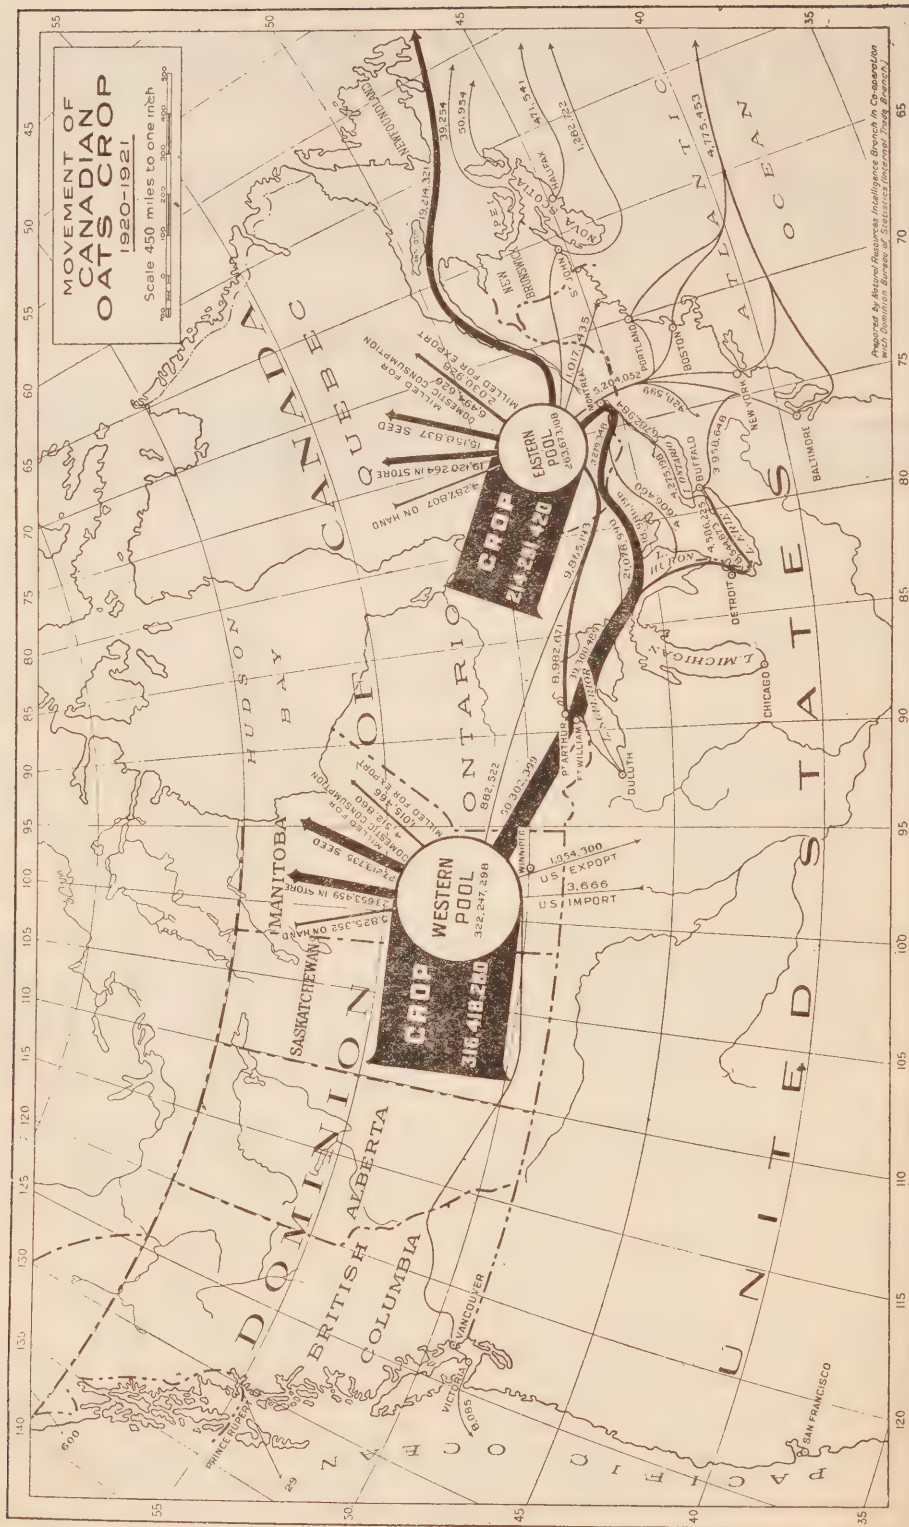

Two main streams are shown as going into the United States. 3,958,648 went by water by way of Buffalo and 2,074,314 moved by rail from the Eastern pool. These with other shipments southerly by rail from the Western Inspection Division as shown in table 74 amount to 7,646,926 bushels, of which 2,871,473 were for United States consumption and 4,775,453 bushels were for re-export to other countries, via United States Atlantic seaboard ports. These shipments together with the shipments of 21,067,556 bushels through Canadian ports (both eastern and western) make a total export movement of 28,714,482 bushels.

During the crop year under discussion the export of Canadian oats through United States ports dropped from 5,802,538 bushels in 1919-20 to 4,775,453, as compared with an increase from 3,427,156 bushels to 21,067,556 bushels in the movement through Canadian ports.

As in wheat, complete data showing the movement by inspection divisions and for Canada as a whole are contained in tables 71, 72 and 73. Summaries are also shown in the report dealing with the handling of the grain by the several classes of elevators and centres throughout Canada.

BARLEY, FLAX AND RYE.

For details of the production and distribution of these grains, readers are referred to tables 71, 72 and 73. The movement of barley is also shown graphically on page 15. As in the case of oats, the percentage of these grains exported is much smaller than in wheat, the bulk being consumed within the country.

Prepared by Natural Resources Intelligence Branch in Co-operation with Dominion Bureau of Statistics (Economic Branch)

Grand total.....	8,827,762	15,786,440	24,614,202	16,231,060	14,912,630	17,527,580	48,671,270

Note—The apparent discrepancy between receipts and shipments of elevator by-products is due to the fact that a large portion of the products originate within the elevators in question.

SUMMARY OF DISTRIBUTION BY DIVISIONS

TABLE No. 71.—Summary of Distribution of Grain in Western Inspection Division, during the crop year 1920-21

	Wheat	Oats	Barley	Corn	Flax	Rye
	Bush.	Bush.	Bush.	Bush.	Bush.	Bush.
1. On hand Sept. 1, 1920—						
In farmers' hands.....	1,667,900	4,872,700	354,600		76,000	51,000
In country elevators.....	980,000	560,000	210,000		48,000	
In interior terminals.....	548,669	44,515	7,830		13,413	2,202
In public terminals.....	958,186	196,796	140,148		445,454	53,661
In private terminals.....	96,956	98,518	23,725		7,219	2,346
In flour mills.....	328,517	52,823	15,194	994		3,091
Total.....	4,580,228	5,825,352	751,497	994	590,086	112,300
2. Crop, 1920.....	235,059,827	316,418,280	41,185,304	520	7,590,380	8,412,928
3. Shipped in—						
From U.S.A. and other countries.....	269,892	3,666	414	1,411,433	8,573	2,635
4. Total annual stock (=sum of 1, 2 and 3) ..	239,909,947	322,247,298	41,937,215	1,412,947	8,189,039	8,527,863
5. Shipped out—						
To U.S.A.....	46,272,438	2,442,874	231	1,297	2,683,381	405,567
To United Kingdom and other countries	37,717,742	3,138,452	1,998,314			826,870
To eastern division.....	79,668,563	44,076,446	8,881,084		1,240,236	1,471,149
Total.....	163,658,743	49,657,772	10,879,629	1,297	3,923,617	2,703,586
6. Milled consumption.....	21,404,712	4,512,860	164,070	73,836		38,457
" export.....	2,935,179	1,015,466				4,216
7. Total disposed of commercially (=sum of 5 and 6).....	187,998,634	55,186,098	11,043,699	75,133		2,746,259
8. Used for seed.....	38,900,860	27,213,735	4,239,258		1,066,294	2,540,874
9. In store—						
In farmers' hands.....	745,500	15,579,000	420,000		46,700	31,400
In country elevators.....	1,568,689	3,195,676	792,955		195,402	15,025
In interior terminals.....	16,346	1,145,994	10,369		2,660	1,432
In terminal elevators.....	1,778,465	2,881,274	660,002		1,150,888	377,547
In private terminal elevators.....	572,370	640,988	157,591		311,821	14,127
In flour mills.....	577,703	210,527	10,056	2,797		1,248
Total.....	5,257,073	23,653,459	2,050,973	2,797	1,707,471	440,779
10. Total accounted for (=sum of 7, 8 and 9) ..	232,156,567	106,053,292	17,333,930			5,727,912
11. Balance consumed in Canada, including loss in cleaning, etc. (=4-10).....	7,753,380	116,194,006	24,603,285			2,799,951
12. Total (sum of 10 and 11).....	239,909,947	322,247,298	41,937,215			8,527,863
13. Amount inspected.....	187,185,000	72,792,000	14,904,400	2,000	5,598,600	3,251,250
14. Per cent of crop inspected.....	79.63	23.00	36.19			38.65
15. Per cent of commercial grain inspected (line 13 of 10).....	80.62	68.63	85.98			56.76
16. Commercial grain from seasons' crop (=9 +7-1-3).....	188,405,587	73,010,539	12,342,761			3,072,103
17. Per cent of crop for commerce (= % line 16 of line 2).....	80.15	23.07	29.96			36.51
18. Value of crop.....	\$372,997,000	133,410,600	29,433,600	5,200	14,304,600	10,889,800

†Russia not included.

Exporting countries: *Germany, U.S.A., Canada, Poland, France, Spain, Czecho-Slovak, Roumania and Bulgaria.*

Importing countries: *Belgium, Denmark, Great Britain and Ireland, Italy, Netherlands, Sweden and Switzerland.*

HARVEST TIMES OF THE WORLD

The following shows the month of the Wheat harvest in the Wheat-growing sections of the world:—

January.....	Australia, New Zealand, and Chili.
February and March.....	East India, Upper Egypt.
April.....	Lower Egypt, Syria, Cyprus, Persia, Asia Minor, India, Mexico, and Cuba.
May.....	Algeria, Central Asia, China, Japan, Morocco, Texas, and Florida.
June.....	Turkey, Greece, Italy, Spain, Portugal, south of France, California, Louisiana, Mississippi, Alabama, Georgia, Carolinas, Tennessee, Virginia, Kentucky, Kansas, Arkansas, Utah, Missouri.
July.....	Roumania, Bulgaria, Austro-Hungary, south of Russia, Germany, Switzerland, France south of England, Oregon, Nebraska, Minnesota, Wisconsin, Colorado, Washington, Iowa, Illinois, Indiana, Michigan, Ohio, New York, New England, and Eastern Canada.
August.....	Belgium, Holland, Great Britain, Denmark, Poland, Canada, Columbia, North and South Dakota, Western Canada.
September and October.....	Scotland, Sweden, Norway, and north of Russia.
November.....	Peru, South Africa and Argentina.
December.....	Burmah and Argentina.

GRAIN STATISTICS, 1922.

PREFACE.

The present report on the Grain Trade of Canada is issued by the Internal Trade Branch of the Dominion Bureau of Statistics in collaboration with the Board of Grain Commissioners for Canada, and is the fifth of its series.

The report has been prepared by Mr. W. Dougan under the supervision of Mr. E. J. Horning, B.A., F.S.S., Chief of the Internal Trade Branch of the Bureau.

Statistics are presented showing in detail the various channels and markets through which the grain passes from the farm to its final destination. Comparative data are also included for other countries than Canada bringing the grain and cereal resources of the world into review.

The first part of the report deals with the domestic movement of grain—the production, inspection and handlings at country, interior terminal, public terminal and private terminal elevators in the Western Inspection Division (comprising Fort William and Port Arthur and all points west thereof) and at public elevators in the East, including handlings of United States grain in the eastern elevators.

Tables have been added in the present report showing freight rates for transporting grain. It has been endeavoured to show such transportation costs from the farm to final markets. Tables include rail rates from representative western points to the head of the lakes, lake and rail rates to eastern Canadian ports on both domestic and export bases, and ocean rates from Montreal to representative European ports. Rates via Vancouver are also given by rail from western points and ocean rates to the Orient and to Europe via the Panama canal. Ocean insurance rates are also summarized. Comparative figures for previous years have been included when possible.

Features of earlier issues of the report have been extended and enlarged. An effort has been made to bring the material presented into final review. New charts and summaries have been introduced for this purpose.

Records of cash prices of wheat and other grains are shown for Winnipeg and Toronto with comparative figures for United States and British markets. Average future options at Winnipeg, Minneapolis, Duluth, and Chicago have also been tabulated.

An important portion of the data has been supplied by Mr. E. A. Ursell, Statistician, of the Board of Grain Commissioners for Canada. The data relating to the international grain trade are based upon the statistics of the International Institute of Agriculture and other official sources. The Board of Railway Commissioners has supplied the data relating to railway freight rates. The cordial thanks of the Bureau are tendered to the several departments co-operating as above, and to elevator and other officials who have also assisted.

R. H. COATS,
Dominion Statistician.

MOVEMENT OF CANADIAN WHEAT CROP (IN BUSHELS) 1921-1922

Scale of miles
0 50 100 200

MOVEMENT OF CANADIAN WHEAT, CROP YEAR 1921-1922.

The accompanying map has been prepared to show graphically the movement of Canadian wheat from the time it leaves the hands of the farmers until it reaches its ultimate destination whether it be the flour mill for grinding in Canada, or for export, still in the form of grain.

Under section 12 of the Canada Grain Act, 1912, Canada has been divided into two main inspection divisions, the Western and the Eastern, the Western Division including Fort William and Port Arthur and all territory west thereof. This division has been followed in tracing the grain from the farm to the consumer and the expedient has been adopted of showing a pool for each division, with the principal streams into and out of each of these pools during the crop year 1921-1922.

The total wheat crop of 1921, which was marketed during the crop year from September 1, 1921, to August 31, 1922, amounted to 300,858,100 bushels. Of this crop 281,295,900 bushels were produced in the Western Inspection Division. To this must be added the stocks on hand at the beginning of the crop year, 5,257,073 bushels, and the amounts shipped in from the United States, 206,001 bushels. There was therefore a total of 286,758,974 bushels of wheat in the Western pool for disposition.

The amount of wheat disposed of commercially from the Western pool amounted to 217,428,385 bushels, made up as follows:—

Direct Exports:—

To United States.....	15,808,860	bushels.
To United Kingdom.....	75,014,769	"
To other countries.....	18,744,302	"
Total.....	109,567,931	"

Shipments to Eastern Division.....	86,677,294	bushels.
Milled for home consumption.....	18,333,400	"
Milled for export.....	2,849,760	"
Total.....	217,428,385	"

In addition to the amount disposed of commercially as above it is estimated that 37,224,692 bushels were required on the farms for seed purposes, and the wheat shown in store and still in farmers hands at the end of the crop year, August 31, 1922, amounted to 12,056,578 bushels. The total accounted for above is 266,709,655 bushels. The balance includes grain found unmerchantable, lost in handling or consumed on the farm for other purposes than seed.

The primary movement of the wheat is, of course, from the farm to the inspection points and then on to the public and private terminal elevators at Fort William and Port Arthur, or to Vancouver. Inspections amounted to 231,606,300 bushels, or 82.3 per cent of the total crop. Receipts at the head of the lakes were 190,878,531 bushels. The small quantity of 3,306 bushels was shipped by rail to the east without touching the head of the lakes (via Armstrong, Ont.). 12,430,783 bushels were shipped by rail from Fort William and Port Arthur: This includes shipments to the Ogilvie Flour Mills Co., at Fort William for grindings. These, with direct shipments other than those via Armstrong amounted to 12,928,503 bushels, making a total all-rail movement eastward from the Western Inspection Division of 12,931,809 bushels. Lake shipments from Fort William and Port Arthur were 175,575,486 bushels, 73,553,637 bushels going to Canadian ports and 102,021,849 to United States ports.

The crop of 1921 showed an increase over 1920—281,295,900 bushels of wheat having been grown in the Western Division in 1921, as compared with 235,059,827 bushels in 1920. This increase was reflected in the water movement, a gain of 52,515,909 bushels being shown, but rail shipments decreased 11,388,177 bushels. The increase in the water movement was divided between Canadian and United States ports as follows:—

	1920-1 Shipments. Bush.	1921-2 Shipments. Bush.	Increase. Bush.
Canadian ports.....	55,270,869	73,553,637	18,282,768
United States ports.....	67,788,708	102,021,849	34,233,141
	<hr/> 123,059,577	<hr/> 175,575,486	<hr/> 52,515,909

Canadian wheat shipped from Duluth by water amounted to 1,122,481 bushels, 191,848 going to Canadian ports and 930,633 bushels to United States points.

Of the total lake shipments from Fort William and Port Arthur, 34,694,627 bushels were received at Georgian Bay ports, rail shipments from which totalled 34,672,330 bushels, an increase of approximately 4,000,000 bushels. The bulk of these shipments no doubt found their destination in the port of Montreal for export. Elevators situated at Goderich received 10,017,637 bushels by water. Shipments from these elevators amounted to 9,903,679 bushels (including grain milled at the plant of the Western Canada Flour Mills Company, situated at Goderich). Port Colborne elevators received 29,516,306 bushels by water and a further small quantity of 12,676 bushels by rail, a total of 29,528,982 bushels, an increase of 11,452,117 bushels over the receipts during the previous crop year. Shipments from these elevators amounted to 29,446,931 bushels, 20,814,036 bushels being shipped by water and 8,632,895 bushels by rail. Rail shipments include grain transferred to the Maple Leaf Milling Company's plant at Port Colborne for grinding. A total of 20,888,976 was received at Montreal by water of which quantity 1,208,210 bushels were direct shipments from the head of the lakes. Rail receipts at Montreal amounted to 17,352,563 bushels, making a total quantity of 38,241,539 bushels of Canadian wheat handled at Montreal during the crop year 1921-22.

Shipments by water from Fort William and Port Arthur to United States Lake ports, with comparative figures for the previous year were as follows:—

Destination—	1920-1 Bushels.	1921-2 Bushels.
Duluth-Superior.....	4,990,940	165,000
Chicago.....	1,550,485	—
Port Huron.....	—	461,000
Detroit.....	411,440	—
Toledo.....	1,753,496	1,652,902
Cleveland.....	895,800	—
Erie.....	—	2,287,090
Fairport.....	110,000	442,500
Buffalo.....	57,626,003	97,013,357
Other United States ports.....	450,544	—
Total.....	<hr/> 67,788,708	<hr/> 102,021,849

According to returns compiled by the Customs Department some 70,697,332 bushels of wheat were exported direct from Fort William and Port Arthur to Great Britain and 15,223,768 bushels to other countries (not including the United States). There was also a small export of 800 bushels direct from Brandon, Man., to other countries. These shipments were made via United States seaboard ports.

The quantity of wheat shipped from the Western Inspection Division into the Eastern pool was 86,677,294 bushels. The crop in the east amounted to 19,562,200 bushels, a decrease of 8,567,273 bushels compared with the previous year. The quantity on hand at the beginning of the crop year was 2,599,732 bushels. Imports from the United States amounted to 42,250 bushels, making a total stock entering the Eastern pool of 108,881,476 bushels.

Export shipments out of the Eastern pool direct to the United States were 159,309 bushels; to the United Kingdom and other countries, 48,822,517 bushels—37,279,911 bushels going to the United Kingdom and 11,542,606 bushels to other countries; a total export movement of 48,981,826 bushels. Of this quantity of 48,822,517 bushels for overseas, 34,734,951 bushels were routed via Canadian seaboard ports and 14,087,566 via United States ports.

The quantity of wheat ground in the mills in the east for consumption in Canada was 18,666,600 bushels and for export as flour, 32,603,890 bushels, a total of 51,270,490 bushels. The total disposed of commercially in the Eastern Division was 100,252,316 bushels. Of the balance, 2,015,020 bushels were required for seed, and the carry over at the end of the crop year was 3,956,395 bushels. The total thus accounted for amounts to 106,223,731 bushels, the balance being unmerchantable grain, loss in handling, and consumption for feed.

Exports via Canadian eastern seaboard ports as shown above amounted to 34,734,951 bushels. These shipments were distributed as follows, comparative figures being also shown for the crop year 1920-21:—

	1920-21 Bushels.	1921-22 Bushels.
Montreal.....	25,784,118	27,484,234
Quebec.....	41,186	645,817
Total—St. Lawrence ports.....	25,825,304	28,130,051
North Sydney, N.S.....	400	2
Halifax, N.S.....	333	—
St. John, N.B.....	6,474,839	6,604,898
Total.....	32,300,876	34,734,951

The crop year 1921-22 is notable for the appearance of Vancouver, B.C., as an outlet for export grain destined to Great Britain and other European countries, via the Panama canal. During previous years small exports have been made, but mainly to the Orient. The exports via Vancouver during the five crop years 1917-18 to 1921-22 were as follows:—

Crop Year..	To United States. Bush.	To United Kingdom and Other Countries. Bush.	Total. Bush.
1917-18.....	7,287	305,063	312,350
1918-19.....	7,752	*414,571	422,323
1919-20.....	2	—	2
1920-21.....	106,419	466,328	572,747
1921-22.....	6,667	<div style="display: inline-block; vertical-align: middle;"> <div style="display: flex; align-items: center;"> <div style="margin-right: 5px;">{</div> <div style="margin-right: 5px;">U.K.</div> <div>4,317,437</div> </div> <div style="margin-right: 5px;">{</div> <div style="margin-right: 5px;">O.C.</div> <div>3,519,734</div> </div>	7,843,838
		Total. 7,837,171	

* Includes re-export of Australian wheat.

The total exports of Canadian grain via Canadian seaboard ports, both Atlantic and Pacific, during the crop year 1921-22 therefore amounted to 42,572,122 bushels.

The amount shipped by rail from the Eastern Inspection Division to the United States for consumption was 159,309 bushels and for re-export to other countries 14,087,566 bushels, a total of 14,246,875 bushels, 3,615,653 leaving Canada through Ontario ports of exit, 10,112,348 through Coaticook, P.Q., and 359,565 bushels through St. John's and Abercorn. Exports of Canadian wheat through Portland, Me., amounted to 10,372,999 bushels.

Total exports from Canada to the United States for consumption amounted to 15,968,169 bushels, to the United Kingdom 112,294,680 bushels, to other countries 30,286,908. 42,572,122 bushels were shipped via Canadian ports and 100,009,466 bushels were shipped by United States ports. Total exports of wheat from Canada during the crop year 1921-22 amounted to 158,549,757 bushels.

Comparative figures of export shipments overseas via Canadian and United States seaboard ports are as follows:—

Crop Year.	Via Canadian Ports.	Via United States Ports.	Total.
1918-19.....	35,292,000	19,102,080	54,394,080
1919-20.....	48,345,771	13,023,281	61,369,052
1920-21.....	32,767,225	54,193,010	86,960,235
1921-22.....	42,572,122	100,009,466	142,581,588

The bulk of the exports via United States ports during the crop year 1921-22 passed through New York and Philadelphia, the former shipping 39,681,733 bushels and the latter 28,117,198 bushels. Other United States ports handled Canadian grain in the following order: Portland, Baltimore, and Boston. Detailed information of this movement is shown in table 89. These figures are compiled from reports issued by the United States Bureau of Foreign and Domestic Commerce.

Complete data showing the movement of wheat and other grains by inspection divisions and for Canada as a whole are contained in tables 83, 84, and 85. Summaries of the handling of grain by the different classes of elevators—country, interior terminal, public terminal, private terminal and public elevators in the east—show the movement through each particular grain centre in Canada during the crop year. Those wishing to make a more detailed study of the movement of wheat and other grains are referred to these summaries.

MOVEMENT OF CANADIAN OATS, CROP YEAR 1921-2.

The crop of oats harvested in Canada in 1921 amounted to 426,232,900 bushels, a decrease of 104,476,800 bushels from the crop of 1920. Of this crop, 287,184,904 bushels were grown in Western Canada, 29,233,376 bushels less than in 1920. The quantity carried over from the previous year was 23,653,459 bushels. In addition a small quantity amounting to 3,113 bushels was imported from the United States, making a total supply of 310,841,476 bushels. Of this, 51,626,172 bushels were used for commercial purposes, that is, shipped out of the division or ground in mills situated within the division. Shipments out of the division amounted to 46,866,156 bushels, made up as follows: direct exports to the United States, 1,310,198 bushels; to the United Kingdom, 4,501,516 bushels; to other countries, 1,288,623 bushels; 39,765,819 bushels to the Eastern Inspection Division; 3,832,340 bushels were ground for domestic consumption and 927,676 bushels were exported in the form of manufactured products. The requirements for seed in the west amounted to 21,582,365 bushels and 10,328,956 bushels of oats were in store and in the

hands of farmers at the end of the crop year. A total quantity of 83,537,493 bushels is therefore accounted for. Inspections of oats in the Western Inspection Division amounted to 62,412,000 bushels, only 21.73 per cent of the crop. A large portion of the oat crop is retained by the farmers for feed and does not enter the main channels of the market.

Receipts of oats at the public and private terminal elevators at Fort William and Port Arthur were 39,432,756 bushels. Shipments by lake from the terminals amounted to 32,440,932 bushels and 8,204,508 bushels were shipped by rail. This includes shipments to the Ogilvie Flour Mills Co. at Fort William for grinding. In addition 256,835 bushels were shipped by rail direct via Armstrong, Ont., and with other direct shipments by rail of 5,095,021 bushels, give a total rail movement of 13,556,364 bushels.

Lake shipments to Canadian ports were 26,209,455 bushels, making a total movement to Eastern Canadian points of 39,765,819 bushels. 13,608,202 bushels of the total lake shipments were received at Georgian Bay ports. There had been a large amount in store at these ports from the previous year, and total shipments out amounted to 15,646,730 bushels, all moving by rail. Goderich received 5,369,544 bushels by water and shipped out 5,877,611 bushels by rail. Receipts of oats at the Port Colborne elevators amounted to 7,601,737 bushels. Shipments from Port Colborne by water were 5,600,601 bushels and 1,667,913 bushels by rail, a total of 7,268,514 bushels. Water shipments from Port Colborne were mainly transshipments of grain on the way to Montreal. Direct shipments by water from the head of the lakes to Montreal were 1,547,246 bushels, the total water receipts at that port amounting to 6,441,503 bushels. Rail receipts were 9,077,212, making the total quantity of oats received at Montreal, 15,518,715 bushels.

Lake shipments from Fort William and Port Arthur to United States ports included 357,707 bushels for Port Huron and 5,873,770 bushels for Buffalo.

Direct exports of oats to the United States from the Western Inspection Division amounted to 1,310,198 bushels. Of that amount 357,706 bushels were exported direct from Fort William and Port Arthur, the balance of 952,492 bushels being shipped southerly by rail. Similarly exports to the United Kingdom and other countries amounted to 4,501,516 bushels and 1,288,623 bushels respectively. Of the shipments to the United Kingdom, 88,600 bushels were routed via Vancouver, B.C., and 4,412,916 bushels via the head of the lakes. Exports to other countries were routed as follows: via Vancouver, B.C., 51,793 bushels; via Prince Rupert, 138 bushels; via Dawson, 1,098 bushels; via Brandon, 50 bushels; via Fort Frances, 4,704 bushels; and the balance of 1,230,840 bushels went through the head of the lakes.

The oat crop in the Eastern Inspection Division was estimated at 139,047,996 bushels. This represents a large decrease of 75,243,424 bushels from the previous year. Shipments from the west as above were 39,765,819 bushels. Imports from the United States amounted to 673,922 bushels. The carry over from the previous year of 19,120,264 bushels makes a total flow into the Eastern pool of 198,608,001 bushels.

The distribution of this supply was as follows: 3,398,490 bushels were milled for consumption in Canada; 1,926,713 bushels were milled for export; exports of oats as grain from the port of Montreal amounted to 11,789,480 bushels; Quebec, 19,422 bushels; St. John, N.B., 2,292,478 bushels; Halifax, 515,735 bushels; North Sydney, N.S., 69,467 bushels; Charlottetown, 4,617 bushels; Summerside, 536 bushels. Total export shipments from Canadian Atlantic seaboard ports amounted to 14,691,735 bushels.

The United States imported 810,851 bushels for consumption from the Eastern Inspection Division and 4,435,325 bushels were shipped from the east to the United Kingdom and other countries via United States Atlantic ports, making total shipments by rail from the east into the United States of 5,246,176 bushels.

Seed requirements in the east amounted to 14,770,707 bushels, and 4,944,617 bushels were carried over into the next crop year.

Two main streams are shown as going into the United States: 6,231,477 bushels went by water to Port Huron and Buffalo and 5,246,176 moved by rail from the eastern pool. These with other southerly by rail from the Western Inspection Division as shown in table 86 amount to 12,204,884 bushels, of which 2,121,049 bushels were for United States consumption and 10,083,835 bushels were for re-export to other countries via United States Atlantic ports. These shipments together with the shipments of 14,833,364 bushels through Canadian ports (both eastern and western) and exports to the United States as above, make a total export movement of oats of 27,038,248 bushels.

Comparative figures of export shipments of oats overseas via Canadian and United States seaboard ports from 1918-19 to 1921-22 are as follows:—

Crop Year.	Via Canadian Ports.	Via United States Ports.	Total.
1918-19.....	1,263,253	10,966,254	11,229,507
1919-20.....	3,427,156	5,802,538	9,229,694
1920-21.....	21,067,556	4,775,453	25,843,009
1921-22.....	14,833,364	10,083,835	24,917,199

Complete data showing the movement of oats by inspection divisions and for Canada as a whole are contained in tables 83, 84 and 85. Summaries are also shown in the report dealing with the handling of the grain by the several classes of elevators and centres throughout Canada.

MOVEMENT OF UNITED STATES GRAIN THROUGH CANADA CROP YEAR SEPTEMBER 1, 1921 TO AUGUST 31, 1922.

A map showing the flow of United States grain through Canada is also included in the present report. This grain is harvested earlier than grain grown in Canada on the whole, the United States crop or marketing year extending from July 1 to June 30, as compared with September 1 to August 31 in Canada. It has not been possible to show the receipts at the individual Georgian Bay ports graphically but the figure representing such receipts has been placed approximately at the location of the port.

When it is considered that the gross receipts of United States grain at Canadian public elevators in the Eastern Inspection Division reached the total of 184,226,244 bushels during the crop year 1921-22, the importance of this traffic to the elevator and transportation interests of the country will be apparent.

It has been impossible of course to retain trace of the identity of the grain and it must be borne in mind that all grain, except the small amount retained in Canada for consumption, was handled twice, first on its entry at the lake ports and secondly when finally shipped out.

At the beginning of the crop year, September 1, 1921, the amount of United States grain in store in Canadian public elevators in Eastern Canada amounted to 10,996,875 bushels. Receipts during the crop year amounted to 184,226,244 bushels, making the total handlings 195,223,119 bushels. Shipments by water amounted to 116,221,877 bushels, by rail 73,170,298 bushels, a total of 189,392,175 bushels. A balance of 5,830,876 remained in store at the end of the crop year.

127,741,911 bushels were received by water and 56,484,333 bushels by rail. Shipments by water amounted to 116,221,877 bushels, by rail to 73,170,298 bushels. As to individual grains, corn was handled in greatest volume, wheat, rye, oats and barley following in the order named.

Receipts and shipments by grains were as follows:—

Grain	Receipts			Shipments		
	Water	Rail	Total	Water	Rail	Total
	Bush.	Bush.	Bush.	Bush.	Bush.	Bush.
Corn.....	69,907,004	35,405,675	105,312,679	62,672,606	43,987,773	106,660,379
Wheat.....	40,132,543	15,323,433	55,455,976	42,410,942	16,452,833	58,863,775
Rye.....	12,358,266	5,116,069	17,474,335	10,059,238	7,625,939	17,685,177
Oats.....	5,292,152	587,455	5,879,607	1,027,390	5,051,807	6,079,197
Barley.....	51,946	51,701	103,647	51,701	51,946	103,647
Total.....	127,741,911	56,484,333	184,226,244	116,221,877	73,170,298	189,392,175

The greater part of this grain was received in the first instance at Georgian Bay ports and Goderich, vessel receipts at these ports totalling 63,274,557 bushels. Shipments by rail amounted to 67,808,943 bushels. Port Colborne received 27,319,127 bushels by water, and shipped 26,648,645 by water and 2,372,582 bushels by rail. The bulk of these shipments later arrived at Montreal for final shipment overseas.

Total receipts at Montreal amounted to 84,849,365 bushels, 37,148,227 bushels coming in by water and 47,701,138 bushels by rail. Shipments out by water were 81,507,094 bushels, by rail 2,437,295 bushels, a total of 83,944,389 bushels. Total receipts at Quebec amounted to 3,960,840 bushels and at St. John, N.B., to 4,822,355 bushels. Shipments from these ports were 3,795,260 bushels and 4,822,353 bushels respectively. Total grain shipped from lake ports does not all reach Montreal, Quebec and St. John, some being retained in Canada for consumption and the balance finding its port of exit in the United States.

Comparative figures of the handlings of United States grain during the crop years 1918-19 to 1921-22 are as follows:—

Crop Year.	Total Handlings. Bush.	Gross Shipments. Bush.
1918-19.....	83,339,773	82,720,191
1919-20.....	35,430,074	33,573,529
1920-21.....	100,499,124	89,502,215
1921-22.....	195,223,119	189,392,172
Increase in 1921-22 over 1920-21.....	94,723,995	99,889,957

The greater part of this grain was in transit through Canada and found its final destination in countries overseas. Vessel shipments from Canadian seaboard ports were as follows:—

Montreal.....	81,507,094 bushels.
Quebec.....	3,243,782 "
St. John.....	4,822,353 "
Total.....	89,573,229 "

In addition rail shipments from Montreal amounted to 2,437,295 bushels and from Quebec to 551,478 bushels. This grain was most likely exported via Portland, Me. The total amount of United States grain re-exported was therefore 92,562,000 bushels.

Canadian grain exported through United States Atlantic ports during the same period was as follows:—

Wheat.....	100,009,466 bushels.
Oats.....	10,083,835 “
Barley.....	4,347,081 “
Rye.....	3,835,593 “
Flax.....	1,235 “
Total.....	118,277,210 “

An outstanding feature of the grain trade during the crop year 1921-22 was that more United States grain was handled in elevators situated in the port of Montreal than grain grown in Canada.

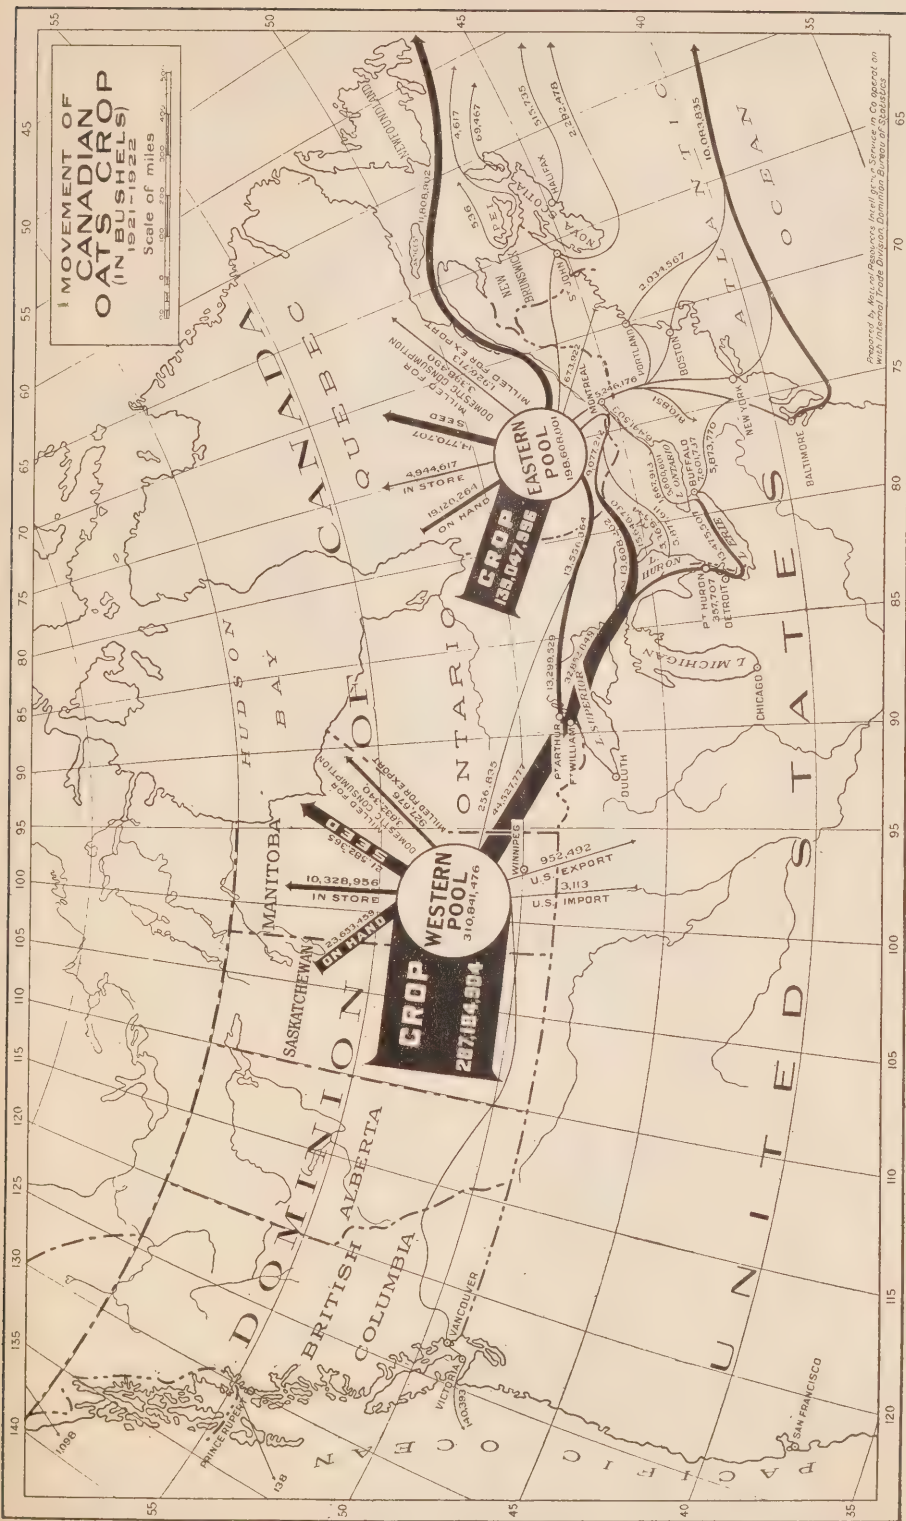

Complete details of the movement of United States grains through Canadian elevators are given in tables No. 63 to 78 inclusive.

BARLEY, FLAX AND RYE.

For details of the production and distribution of these grains, readers are referred to tables 83, 84 and 85. The movement of barley is also shown graphically on page 19. As in the case of oats, the percentage of these grains exported is much smaller than in wheat, the bulk being consumed within the country.

WHEAT ANNUAL DISTRIBUTION OF THE CROP 1909-10 — 1921-22

LEGEND

Production Exports wheat & wheat flour
Retained for seed Retained for home consumption

Prepared in the N.R.I. Service
Dept. of the Interior

SUMMARY OF DISTRIBUTION BY DIVISIONS

TABLE NO. 83.—Summary of Distribution of Grain in Western Inspection Division, during the crop year 1921-22

	Wheat	Oats	Barley	Flax	Rye
	Bush.	Bush.	Bush.	Bush.	Bush.
1. On hand Sept. 1, 1921—					
In farmers hands.....	745,500	15,579,000	420,000	46,700	31,400
In country elevators.....	1,566,689	3,195,676	792,955	195,402	15,025
In interior terminals.....	16,346	1,145,904	10,369	2,660	1,432
In terminal elevators.....	1,778,465	2,881,274	660,002	1,150,888	377,547
In private terminal elevators.....	572,370	640,988	157,591	311,821	14,127
In flour mills.....	577,703	210,527	10,056		1,248
Total.....	5,257,073	23,653,459	2,050,973	1,707,471	440,779
2. Crop 1921.....	281,295,900	287,184,904	45,032,394	3,947,108	19,237,332
3. Shipped in from U.S.A.....	206,001	3,113	843		1,061
4. Total annual stock (=sum 1, 2 and 3).....	286,758,974	310,841,476	47,084,210	5,654,579	19,679,172
5. Shipped out—					
To U.S.A.....	15,808,860	1,310,198	2,747	2,612,686	85,025
To United Kingdom.....	75,014,769	4,501,516	2,120,890		1,987,369
To other countries.....	18,744,302	1,288,623	585,172		1,680,496
To eastern division.....	86,677,294	39,765,819	10,144,533	1,517,502	727,871
Total.....	196,245,225	46,866,156	12,853,342	4,130,188	4,480,761
6. Milled consumption.....	18,333,400	3,832,340	43,795		15,370
Milled export.....	2,849,760	927,676			
7. Total disposed of commercially (=sum 5 and 6).....	217,428,385	51,626,172	12,897,137		4,496,131
8. Used for seed.....	37,224,692	21,582,365	3,984,720	277,521	2,899,788
9. In store—					
In farmers hands.....	1,767,000	7,921,000	426,000	2,600	56,400
In country elevators.....	4,657,202	1,461,006	768,951	89,620	753,030
In interior terminals.....	88,082	49,257	5,999	171	2,917
In terminal elevators.....	2,839,631	486,715	273,100	157,756	609,171
In private terminal elevators.....	1,755,722	336,207	124,878	32,997	176,691
In flour mills.....	948,941	74,768	14,646		1,219
Total.....	12,056,578	10,328,956	1,613,574	283,144	1,599,428
10. Total accounted for (=sum 7, 8 and 9).....	266,709,655	83,537,493	18,495,431		8,995,347
11. Balance consumed in Canada including loss in cleaning, etc. (=4-10).....	20,049,319	227,303,983	28,588,779		10,683,825
12. Total (sum of 10 and 11).....	286,758,974	310,841,476	47,084,210		19,679,172
13. Amount inspected.....	231,606,300	62,412,000	14,000,000	2,784,100	5,754,075
14. Per cent of crop inspected.....	82-33	21-73	31-08	70-53	29-91
15. Per cent of commercial grain inspected (line 13 of 10).....	86-84	74-71	75-69		63-96
16. Commercial grain from seasons crop (=9 and 7-1-3).....	224,021,889	38,298,556	12,512,153		5,653,719
17. Per cent of crop for commerce=% line 16 of line 2).....	79-64	13-33	27-78		29-38
18. Value of crop.....	\$220,630,314	\$ 72,314,260	\$ 17,308,590	\$ 5,481,225	\$ 13,275,172

*January 1, 1916 on wheat and other grain only.

*Not effective on wheat until 1st June, 1918.

NOTE.—Grain and Grain Products consist of the following.

GRAIN

Barley
Buckwheat
Corn, except Corn for popping
Oats
Rye
Speltz
Wheat

GRAIN PRODUCTS

Alfalfa meal
Barley cleanings
Breakfast foods or cereals (uncooked) in bags, barrels or
cases
Bran
Buckwheat flour
Chopped feed
Corn Flour

Corn Meal
Crushed oats
Feed Grain, in sacks
Flour (made from grain only)
Grits
Groats
Malt
Middlings
Millfeed
Oat hulls
Oatmeal
Pearl barley, in bags or barrels
Pot barley, in bags or barrels
Rolled oats
Rolled wheat
Rye flour and meal
Sweepings and screenings
Shorts
Sprouts, barley
Wheatmeal
Flaxseed includes Linseed Meal, Oilcake and Oil Meal.

November 16 to November 25.....	“.....	52½c.

TABLE No. 133.—Ocean Freight Rates from Vancouver, B.C., to United Kingdom and Continent via Panama Canal

BULK WHEAT SHIPMENTS

October 1921 opened at 20.53c. per bushel then lowered to 19.55c. per bushel towards end of month. There was one booking at 16.30c. per bushel, subsequently the market rose to 19.55c.; 22.81c., 24.44c. and 26.07c. per bushel, the bulk of the business being done at 19.55c. and 21.18c. per bushel. The business gradually became firmer until March a few thousand bushels were booked at 27.70c. per bushel and the latter half of that month bids of 29.33c. were made for space but 32.59c. was asked. Early in April the market eased off and shippers were again offering space at 27.38c. with a little business done. Towards the end of April the rate dropped to 19.55c.-21.18c. with nominal price of 19.55c. During May, June and July the rate fluctuated between 19.55c. and 22.81c. with an average of 21.18c. At the close while no bookings are being made owing to crop movement the nominal rate is 19.55c. per bushel.

TABLE No. 134.—Ocean Freight Rates from Vancouver to Yokohama, Shanghai and Hong Kong

SACKED WHEAT—PER BUSHEL

September, 1921, opened 22½c. per bushel, gradually declined to 21c., 19½c. and 18c. per bushel. 18c. per bushel was the ruling rate at the end of December, 1921.
 January—Rate was 18c. to 19½c. per bushel which went down by March to 15c. and even 12c. per bushel.
 The current rate is variously 12c. to 15c. per bushel according to negotiation.

PUBLICATIONS OF THE DOMINION BUREAU OF STATISTICS RE GRAIN, FLOUR MILLING, ETC.

(1) Monthly Bulletin of Agricultural Statistics, carried out in collaboration with Provincial Departments of Agriculture, recording general agricultural conditions statistically for month to month, with special references to acreages, conditions and yields of field crops, agricultural prices, wages, etc., etc. The September, November and January issues of the Bulletin contain the official annual estimates of the crop.

(2) An annual report on the Grain Trade of Canada, showing the general movement of grain throughout Canada from the farm to final market and in relation to the grain trade of the world.

(3) A weekly statement showing stocks of grain in store, receipts and shipments at country elevators, interior terminal elevators, public and private terminal elevators in the Western Inspection Division, and at public elevators in the East, together with a statement showing stocks of Canadian grain at United States Lake and Atlantic ports.

(4) Monthly supplements are added to the weekly grain statistics mentioned above, showing exports of grain and principal grain products by ports of exit and by shipping routes, together with inspections by months in both the Western and Eastern inspection divisions.

(5) A monthly statement showing grain ground and products produced by merchant and customs mills in Canada.

(6) An annual report on the Flour Milling Industry.

(7) The monthly and annual trade statistics of the Bureau contain full details of the imports and exports of grain, flour, etc., whilst canal statistics and general transportation statistics include a full treatment of grain traffic by rail and water. Grain and flour prices are comprehensively covered in the annual report on prices of the Internal Trade Branch.

GRAIN STATISTICS, 1923

The present report on the Grain Trade of Canada is compiled in the Internal Trade Branch of the Dominion Bureau of Statistics in collaboration with the Board of Grain Commissioners for Canada.

The report has been prepared by Mr. W. Dougan under the supervision of Mr. F. J. Horning, B.A., F.S.S., Chief of the Internal Trade Branch of the Bureau.

Statistics are presented showing in detail the various channels and markets through which the grain passes from the farm to its final destination. The domestic movement of the grain is covered to show the production, inspection and handlings at country, interior terminal, public terminal and private terminal elevators in the Western Inspection Division (comprising Fort William and Port Arthur and all points west thereof) and at public elevators in the East. Handlings of United States grain in the Eastern elevators and of Canadian grain in the United States are also traced. Records of prices at representative markets, freight rates and insurance charges are included. Comparative data for other countries than Canada bring the grain and cereal resources of the world into review.

An important portion of the data has been supplied by Mr. E. A. Ursell, Statistician of the Board of Grain Commissioners for Canada. The data relating to the international grain trade are based upon the statistics of the International Institute of Agriculture and other official sources. The Board of Railway Commissioners has supplied the data relating to railway freight rates. The cordial thanks of the Bureau are tendered to the several departments co-operating and to elevator and other officials who have also assisted.

R. H. COATS,

Dominion Statistician.

DOMINION BUREAU OF STATISTICS,

OTTAWA, March 1, 1924.

MOVEMENT OF CANADIAN WHEAT, CROP YEAR 1922-23

In 1922 the wheat crop of Canada amounted to 399,786,400 bushels, 375,194,000 bushels being produced in the Prairie Provinces. This exceeded the crop of 1915 which was 393,500,000 bushels, of which 360,187,000 bushels were produced in the West. The quality of the crop was high, the wheat being remarkably clean and of good milling constituents. Ninety-two per cent of the amount inspected graded in the contract grades, No. 3 Northern or better. The crop was harvested early and 3,293 cars of the new crop wheat were inspected during the month of August, 1922.

The inspections by months for the crop years 1921-22 and 1922-23 were as follows:—

Month	Crop Year 1921-22	Crop Year 1922-23	Increase
Number of cars			
September.....	26,353	39,323	
October.....	44,762	54,844	
November.....	31,071	47,251	
December.....	22,732	26,642	
Total four months.....	124,918	168,060	43,142
January.....	8,728	12,081	
February.....	6,148	4,638	
March.....	12,283	9,540	
April.....	5,951	10,224	
May.....	8,850	8,327	
June.....	5,261	7,820	
July.....	4,670	4,940	
August.....	4,843	3,029	
Total for eight months.....	56,734	60,599	3,865
Grand total.....	181,652	228,659	47,007

During the first four months of the crop year 1922-23, 163,995 cars were unloaded at the Head of the Lakes compared with 65,864 for the same period of the previous year. The rapidity of the movement is also shown in the vessel shipments. For the period from September 1 to close of navigation, 1922, shipments were as follows:—

To Canadian Ports.....	Bush. 65,191,491
United States Ports.....	101,012,105
Total.....	166,203,596

For the period from the opening of navigation to August 31, 1923:—

To Canadian Ports.....	Bush. 43,914,080
United States Ports.....	19,059,243
Total.....	62,973,323

Canada is divided into two Grain Inspection Divisions, the Western and the Eastern, under Section 12 of the Canada Grain Act, 1912, Fort William and Port Arthur and all territory west thereof being included in the Western Division. These divisions are followed in showing the flow of Canadian wheat from the farm to its ultimate destination.

The wheat crop in the Western Division in 1922 was 376,261,395 bushels, the amount on hand from the previous year was 12,787,032 bushels, while there was a small import from the United States of 212,781 bushels, making a total for disposition from the Western pool of 389,261,208 bushels. Of this amount 295,246,417 bushels were disposed of commercially. The two chief items were exports made directly from the Western Inspection Division and shipments to the Eastern Division. The major part of the latter was also eventually exported. The following statement shows details of commercial shipments with comparative figures for the previous crop year:—

Direct Exports—	1921-22 Bush.	1922-23 Bush.
To United States.....	15,808,860	12,719,549
To United Kingdom.....	75,014,769	117,039,575
To Other Countries.....	18,744,302	11,073,964
Total Exports.....	109,567,931	140,833,088
Shipments to the Eastern Inspection Division.....	86,677,294	130,405,958
Milled for home consumption.....	18,333,400	20,099,188
Milled for export.....	2,849,760	3,908,183
Total.....	217,428,385	295,246,417

Seed requirements amounted to 37,995,265 bushels and the amount in the elevators and in farmers' hands at the end of the crop year was 5,402,426 bushels.

Wheat inspected during the last crop year amounted to 297,256,700 bushels or 79.1 per cent of the crop. A large part of the wheat marketed eventually finds its way to the terminal elevators at Fort William and Port Arthur or Vancouver, B.C. The receipts at the Head of the Lakes amounted to 244,914,597 bushels. 826,972 bushels were shipped by rail to the East without touching the Head of the Lakes (via Armstrong, Ont.). 18,423,303 bushels were shipped by rail from Fort William and Port Arthur. This includes the amount to Ogilvie Flour Mills Co., at Fort William for grinding. These, with direct shipments other than Armstrong amounted to 19,534,500 bushels, making a total all rail movement eastward from the Western Inspection Division of 20,361,532 bushels. Lake shipments from the Head of the Lakes were 229,176,919 bushels, 109,105,570 bushels going to Canadian ports and 120,071,349 bushels to United States ports.

The Western wheat crop of 1922 showed an increase of 95,465,495 bushels with that of the previous year. This increase was reflected in marketings and shipments, the water movement showing an increase of 53,601,433 bushels or 30.5 per cent over the previous year.

The following summary will show the above increases in the water and rail movement with percentages:—

WATER MOVEMENT

	1921-22	1922-23	+ Increase — Decrease	Per cent of Increase
Canadian Ports.....	73,553,637	109,105,570	+35,551,933	48.3
United States Ports.....	102,021,849	120,071,349	+18,049,500	17.7
Total.....	175,575,486	229,176,919	53,601,433	30.5

RAIL MOVEMENT

	1921-22	1922-23	+ Increase — Decrease	Per cent of Increase
To Canadian Seaboard (Eastern).....	1,602,725	5,274,452	+3,671,727	+229.09
To Canadian Domestic (Eastern).....	6,628,612	10,383,833	+3,755,221	+56.65
To United States Seaboard.....	4,570,802	4,553,458	— 17,344	— 0.37
To United States Domestic Ports.....	129,670	149,789	+ 20,119	+ 15.51
Total.....	12,931,809	20,361,532	+7,429,723	+57.45

The increase in the rail movement was 7,429,723 bushels. The bulk of this increase took place in the movement from Fort William and Port Arthur which increased from 12,430,723 bushels to 18,423,303 bushels. The balance was from Country and Winnipeg Elevators in the Prairie Provinces and an increased amount shipped via Armstrong, Ont.

The Canadian Wheat shipped from Duluth by water amounted to 938,856 bushels to Canadian Ports and 1,100,892 bushels to United States Ports.

According to returns received from the Public Elevators in the East the movement of wheat to Georgian Bay Ports and Goderich was 62,255,194 bushels. Shipments out by rail amounted to 62,316,737 bushels an increase of approximately 27,000,000 bushels over the previous year. The distribution of the 62,316,737 bushels were as follows:—To Montreal direct 23,127,019 bushels; 13,357,650 bushels to Canadian Seaboard; to other Canadian points 11,349,817 bushels; to United States Seaboard 10,274,525 bushels while the amount consumed or milled locally at the above ports was 4,207,726 bushels. The amount received at Port Colborne was 43,529,627 bushels by water and 30,406 bushels by rail, an increase of 14,031,051 bushels. The bulk of this was transhipped to Montreal, viz., 30,788,163 bushels. Montreal received a total of 38,278,879 bushels by water including direct shipments from the Head of the Lakes and other points. There was one other water shipment amounting to 87,007 bushels to Other Canadian Ports. The rail shipments were as follows:—

	Bush.
To Montreal.....	661,531
" Other Canadian Points.....	2,292,261
" Canadian Seaboard.....	53,754
" United States Seaboard.....	171,100
Consumed or ground locally.....	9,528,682

Rail receipts at Montreal amounted to 35,009,841 bushels, which, with the water receipts of 38,278,879 bushels, make a total of 73,288,720 bushels of Canadian wheat handled at Montreal during the crop year 1922-23.

Shipments by water from Fort William and Port Arthur to United States Lake Ports, with comparative figures for the previous year, were as follows:—

Destination—	1921-22 Bush.	1922-23 Bush.
Duluth-Superior.....	165,000	1,012,088
Chicago.....		3,686,252
Port Huron.....	461,000	106,989
Detroit.....		5,042,523
Toledo.....	1,652,902	10,726,760
Erie.....	2,287,090	2,901,681
Fairport.....	442,500	96,514,084
Buffalo.....	97,013,357	80,972
Other United States Ports.....		
Total.....	102,021,849	120,071,349

Customs returns show that 106,532,940 bushels were exported direct from Fort William and Port Arthur to the United Kingdom and 3,750,928 bushels to Other Countries (not including United States). These shipments went by way of Buffalo and other United States Lake Ports to United States Atlantic Seaboard Ports.

The crop in the Eastern Division was 23,525,005 bushels an increase of 3,962,805 bushels; the carryover from the previous year was 3,225,941 bushels; imports from the United States amounted to 204,625 bushels. The shipments from the Western Division were 130,405,958 bushels made up of the amounts shipped from Fort William and Port Arthur by rail and vessel; the vessel shipments from Duluth to Canadian ports and the all-rail movement via Armstrong. The total stock in the Eastern Division amounted to 157,361,529 bushels.

The amount disposed of commercially was 155,516,874 bushels. Of this amount 88,848,726 bushels were exported an increase of 39,866,900 bushels—to the United States 216,499 bushels; to the United Kingdom 56,971,919 bushels; to Other Countries 31,660,308 bushels.

The grindings of wheat in the mills in the East for consumption amounted to 20,765,588 bushels and for export 45,902,560 bushels, a total of 66,668,148 bushels. The seed requirements were 1,786,705 bushels and the carryover at the end of the year was 3,529,692 bushels.

The exports from the Eastern Division via Canadian Eastern Seaboard Ports were 69,045,000 bushels, an increase of 34,310,049 bushels or 99 per cent. The export shipments are shown in the following statement:—

	1921-22	1922-23	+Increases —Decreases	Percent
	Bush.	Bush.	Bush.	
Montreal.....	27,484,234	54,376,331	+26,892,097	97.8
Quebec.....	645,817	2,654,517	+ 2,008,700	311.0
Total, St. Lawrence Ports.....	28,130,051	57,030,848	+28,900,797	102.7
North Sydney, N.S.....	2	—	—	2
Halifax, N.S.....	—	300	+ 300	—
St. John, N.B.....	6,604,898	12,013,852	+ 5,408,954	81.9
Total.....	34,734,951	69,045,000	+34,310,049	99.0

Last crop year Vancouver made her appearance as an important wheat exporting port. During the present year Vancouver has maintained her position. A summary of export shipments via Vancouver is given below:—

Crop Year	To United States	To United Kingdom	To Other Countries	Total
	Bush.	Bush.	Bush.	Bush.
1918-19.....	7,752	*414,571	—	422,323
1919-20.....	2	—	—	2
1920-21.....	106,419	466,328	—	572,747
1921-22.....	6,667	4,317,437	3,519,734	7,843,838
1922-23.....	19	10,506,635	7,323,033	17,829,687

*Includes re-export of Australian Wheat.

Total exports of wheat from Canadian Seaboard Ports during the crop year 1922-23 were 86,874,671 bushels, an increase of 44,302,594 bushels over the previous year.

The quantity exported to the United States for consumption from the Eastern Division was 216,499 bushels. The quantity re-exported to United Kingdom was 18,986,427 bushels and to Other Countries 600,800 bushels. These exports left Canada through the following Quebec and Ontario ports of exit: Coaticook 14,167,769 bushels; Niagara Falls 2,185,628 bushels; St. John's, Que., 1,474,663 bushels, Bridgeburg 1,321,770 bushels; Abercorn 265,488 bushels; St. Armand 86,457 bushels; Prescott 83,305 bushels; Cornwall 2,147 bushels. The exports via Portland, Me., were 16,802,652 bushels.

To summarize the exports of wheat from Canada 12,936,048 bushels went to the United States, 174,011,494 to the United Kingdom and 42,734,272 bushels to Other Countries. 86,748,671 bushels were shipped via Canadian Ports and 129,871,095 bushels via United States ports. The total exports amounted to 229,681,814 bushels, principal countries of destination being as follows:—

	Bush.
To United Kingdom.....	174,011,494
“ United States.....	12,936,048
“ Italy.....	12,281,640
“ Belgium.....	8,452,566
“ Netherlands.....	4,598,151
“ France.....	4,395,422
“ Greece.....	3,400,446
“ Japan.....	3,048,533
“ Germany.....	1,751,962
“ Sweden.....	1,102,501
“ Other Countries.....	3,703,051
Total.....	<u>229,681,814</u>

Comparative figures of export shipments overseas via Canadian and United States Seaboard ports are as follows:—

	Via Canadian Ports	Via United States Ports	Total
1918-19.....	35,292,000	19,102,080	54,394,080
1919-20.....	48,345,771	13,023,281	61,369,052
1920-21.....	32,767,225	54,193,010	86,960,235
1921-22.....	42,572,122	100,009,466	142,581,588
1922-23.....	86,874,671	129,871,095	216,745,766

The United States Bureau of Commerce returns show the amount of Canadian wheat exported from United States Atlantic Seaboard ports was 115,799,903 bushels, compared with 89,844,634 bushels last crop year. New York exported some 47,756,779 bushels; Philadelphia 26,104,236 bushels; Portland shipped 18,388,570 bushels; Baltimore 15,600,473 bushels and Boston 7,949,845 bushels.

Complete data showing the movement of wheat and other grains by inspection divisions and for Canada as a whole are contained in tables 77, 78 and 79. Summaries of the handling of grain by the different classes of elevators—country, interior terminal, public terminal, private terminal and public elevators in the East—show the movement through each particular grain centre in Canada during the crop year. A more detailed study of the movement of wheat and other grains can be made from these summaries.

MOVEMENT OF CANADIAN OATS, CROP YEAR 1922-23

The production of oats in Canada in 1922 was 491,239,000 bushels, an increase of 65,006,100 over the crop of 1921. Of this amount the Western Division produced 292,673,090 bushels. The quantity on hand from the previous year was 10,417,616 bushels. In addition there was a small quantity of 1,946 bushels, imported from the United States, making a total stock of 303,902,652 bushels for distribution from the Western Inspection Division. The amount disposed of commercially was 39,691,717 bushels. Of this 5,486,861 bushels were exported, 88,190 bushels to the United States; 5,336,134 to the United Kingdom and 62,537 bushels to the other countries. 29,132,331 bushels were shipped to the Eastern Inspection Division. The amount milled for consumption was 3,530,091 bushels and 1,562,434 bushels were milled for export. The seed requirements were 19,975,290 bushels, while 10,552,568 bushels were in store in the elevators and farmers' hands at the end of the crop year 1922-23.

The total accounted for is only 70,219 575 bushels. The inspections amounted to 48,944,000 bushels or 16.7 per cent of the crop. Unlike wheat, oats is consumed largely on the farm for feeding purposes and does not enter the commercial markets.

Receipts at the public and private terminal elevators at Fort William and Port Arthur were 27,442,014 bushels. The lake shipments amounted to 19,398,886 bushels, a decrease of 13,041,046 bushels. The rail shipments amounted to 6,235,264 bushels which includes the quantity forwarded to Ogilvie Flour Mills at Fort William for grinding. 1,543,945 bushels were shipped all rail via Armstrong, Ont., which together with other direct shipments of 12,390,668 bushels makes a total rail movement to the East of 13,934,613 bushels. There were 15,121,718 bushels shipped to Canadian ports from the Head of Lakes, making a total movement into the Eastern Division of 29,056,331 bushels. The movement by rail almost equalled the water shipments. Georgian Bay Ports received 4,304,911 bushels and Goderich 2,125,718 bushels, while the shipments from these ports amounted to 4,321,415 bushels and 2,142,334 bushels respectively. The quantity in store from the previous year was 115,814 bushels. Water receipts at Port Colborne amounted to 5,959,231 bushels, the shipments were 5,517,154 bushels and 783,486 bushels by water and rail respectively. The bulk of the oats received at Port Colborne is for transshipment to Montreal. Montreal received 7,987,904 bushels by water and 6,173,763 bushels by rail, a total receipt of 14,161,667 bushels.

Export shipments from the Western Inspection Division direct to the United States amounted to 88,190 bushels. The direct overseas exports amounted to 5,398,671 bushels, 5,336,134 bushels to United Kingdom and 62,537 bushels to other countries. Of the total export overseas of 5,398,671 bushels, 5,310,251 bushels were exported from Fort William and Port Arthur, Vancouver 66,733 bushels; Brandon 20,716 bushels; Dawson 825 bushels and Prince Rupert 146 bushels.

The oat crop in the Eastern Inspection Division was 198,565,910 bushels an increase of 68,517,914 bushels over the previous year. The shipments from the Western Division amounted to 29,132,331 bushels making with a small import of 411,926 and a carryover of 4,855,957 bushels a total of 232,966,124 bushels for distribution. The amount milled for consumption in Canada was 3,500,575 bushels and 781,217 bushels for export. The exports amounted to 18,074,309 bushels, 162,569 bushels of which went to the United States for consumption. The quantity exported from the Canadian Atlantic seaboard ports was 14,889,708 bushels. 3,022,040 bushels were exported via United States ports from the Eastern Division to United Kingdom and other overseas countries, this amount together with 162,569 bushels shipped direct to U.S. making a total rail movement into the United States of 3,184,609 bushels.

Seed required for the East amounted to 14,349,312 bushels, while 10,426,249 bushels was carried in store into the next crop year.

Shipments by water from Fort William and Port Arthur to Buffalo and Toledo amounted to 41,277,168 bushels and 3,184,609 moved by rail from the Eastern pool to the United States. These with other southerly movements by rail from the Western Inspection Division as shown in table . . . amount to 8,603,766 bushels, of which 250,759 bushels were for United States consumption and 8,353,007 were for re-export to other Countries via United States Atlantic ports. Exports via Canadian Pacific ports amounted to 67,704 bushels and 14,889,708 bushels were exported via Canadian Atlantic ports, making a total export movement of 23,561,170 bushels.

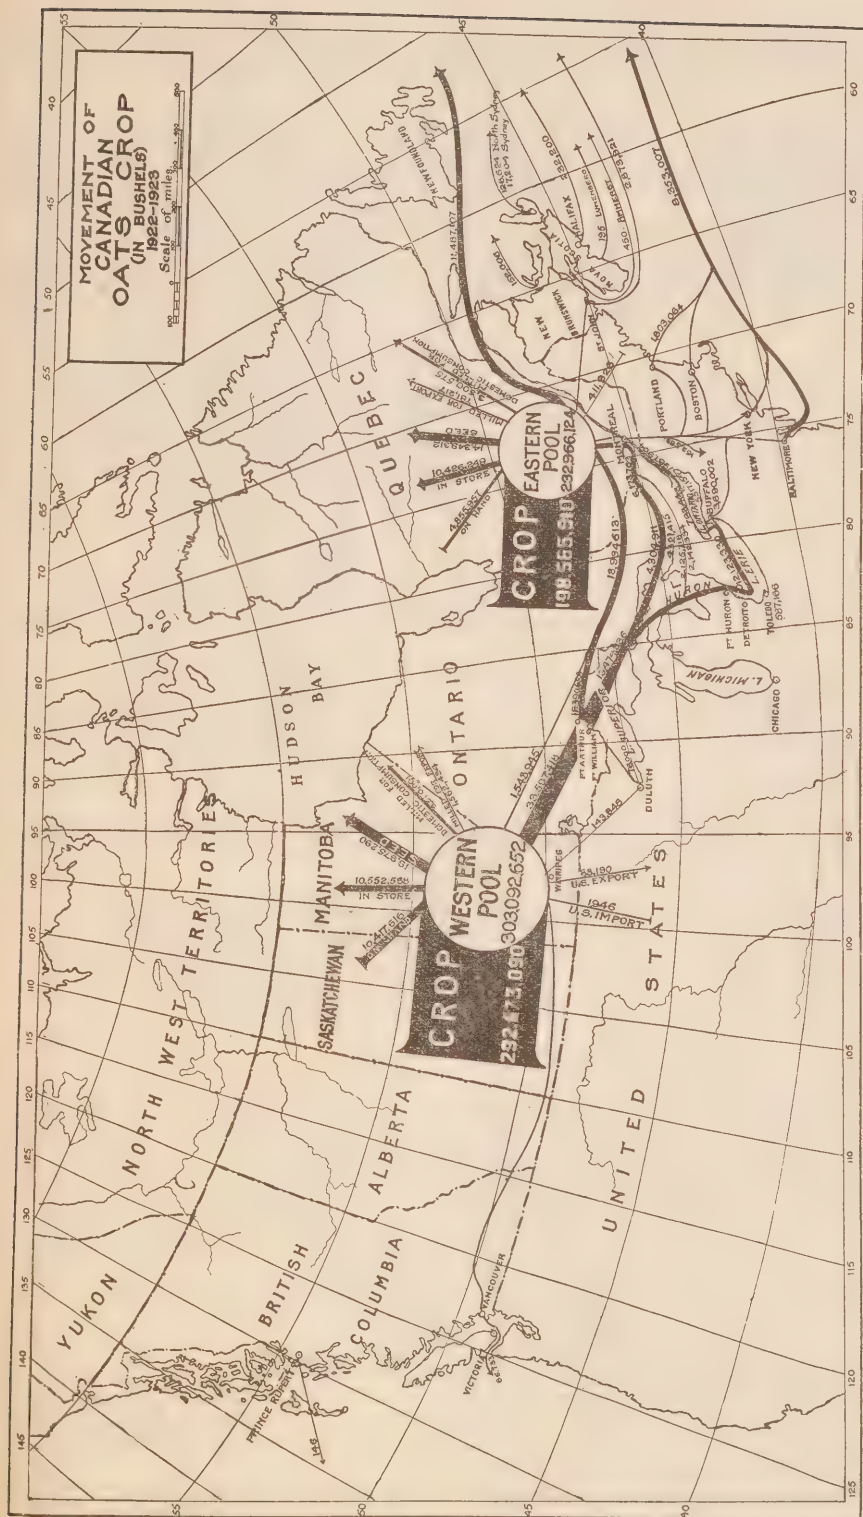

Comparative figures of export shipments of oats via Canadian and United States seaboard from 1918-19 to 1922-23 are as follows:—

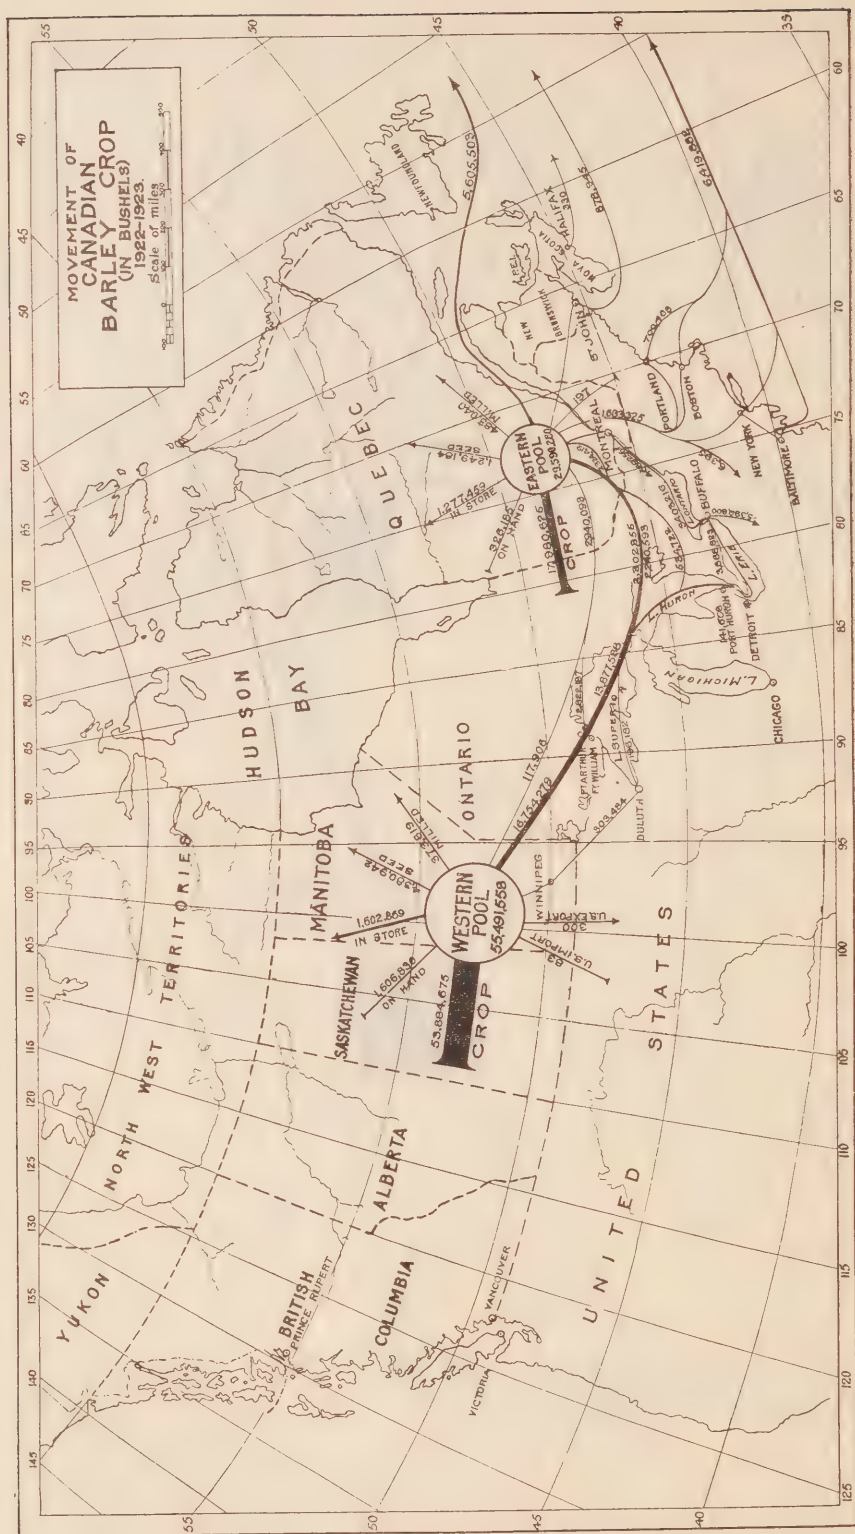

Crop Year	Via Canadian Ports	Via United States Ports	Total
1918-19.....	1,263,253	10,966,254	12,229,507
1919-20.....	3,427,156	5,802,538	9,229,694
1920-21.....	21,067,556	4,775,453	25,843,009
1921-22.....	14,833,364	10,083,835	24,917,199
1922-23.....	14,957,412	8,353,007	23,310,419

Complete data showing the movement of oats by inspection divisions and for Canada as a whole are contained in tables 77, 78 and 79. Summaries are also shown in the report dealing with the handling of the grain by the several classes of elevators and centres throughout Canada.

BARLEY, FLAX AND RYE

For details of the production and distribution of these grains, readers are referred to tables 77, 78 and 79. The movement of barley is also shown graphically on page 18. As in the case of oats, the percentage of these grains exported is much smaller than in wheat, the bulk being consumed within the country.

MOVEMENT OF CANADIAN GRAIN THROUGH THE EASTERN DIVISION FOR THE CROP YEAR 1922-23

The Prairie Provinces produce the bulk of Canada's grain and as the population is small a great deal of it must be shipped out for consumption. The coarse grains are consumed to some extent on the farms for feeding livestock with the exception of flaxseed which is pressed for linseed oil or exported to United States.

The various channels through which the Canadian grain passes from the Head of the Lakes to its final destination are shown on the map on page 21. It is impossible to designate every individual point or port, so the destinations are grouped under the following headings:—"Canadian Seaboard," "Other Canadian Points," "United States Seaboard," "Other United States Points."

Public Elevators in the East are licensed to handle Western grain after it has been inspected, acting as transfer houses. These elevators are located at ports on the Lakes, River St. Lawrence and the Atlantic Seaboard, and are grouped as follows: Georgian Bay Ports, (including Goderich), Lower Lake Ports, St. Lawrence Ports and Seaboard Ports. On the accompanying map these groups are shown by a series of pools in order to simplify the tracing of the movement of the grain.

GEORGIAN BAY PORTS

73,468,716 bushels were handled at Georgian Bay Ports, including a carryover of 575,897 bushels, the amounts for the individual ports being as follows:—

	Bush.
Port McNicoll.....	26,712,713
Goderich.....	17,186,557
Midland.....	16,775,866
Tiffin.....	11,418,525
Depot Harbour.....	933,469
Collingwood.....	441,586
Total.....	73,468,716

The shipments by rail amounted to 72,875,619 bushels destined as follows:—

	Bush.
To Montreal.....	27,047,272
" Canadian Seaboard.....	14,975,159
" Other Canadian Points.....	14,696,945
" United States Seaboard.....	11,325,704
Consumed Locally or Milled.....	4,830,539
Total.....	72,875,619

LOWER LAKE PORTS

The carryover from the previous crop at these ports amounted to 557,608 bushels. Port Colborne received 54,049,536 bushels and Kingston 572,509 bushels by water. A small amount 30,406 bushels and 24,972 bushels were received by rail at Port Colborne and Kingston respectively, making the total amount available for shipment 55,235,031 bushels. 9,528,682 bushels were consumed locally or milled at these ports. The bulk of the balance was forwarded to Montreal, the distribution of the total shipments being as follows:—

	From Port Colborne		From Kingston	
	Rail	Water	Rail	Water
To Montreal.....	Bush. 714,822	Bush. 40,250,590	Bush. 49,415	Bush. 28,715
" Canadian Seaboard.....	95,754	49,698	493,625	
" Other Canadian Points.....	3,069,427	87,007		
" United States Seaboard.....	407,041			
	4,287,044	40,387,295	543,040	28,715

ST. LAWRENCE PORTS

Montreal returns show that 1,632,137 bushels were on hand September 1, 1922 and, 52,093,990 bushels were received by water and 43,610,246 bushels by rail, making a total quantity handled of 97,336,373 bushels. Direct shipments were made to Montreal both by rail and water from the Head of the Lakes and by rail from Western points. The elevator at the Port of Quebec received 2,105,767 bushels by rail and 1,937,585 bushels by water. The quantity of grain on hand at the beginning of the crop year was 121,129 bushels, making the total handlings of grain at Quebec 4,164,481 bushels. The shipments from the Port of Montreal amounted to 82,359,088 bushels by water and 2,858,275 bushels from Quebec, making a total of 85,217,363 bushels shipped from the St. Lawrence Ports. The disposition of the total shipments from Montreal and Quebec was as follows:—

	Montreal Rail	Quebec
To United Kingdom and Other Countries—water.....	82,359,088	2,858,275
“ Canadian Seaboard—rail.....	15,659
“ Other Canadian Points—rail.....	1,649,116	339,136
“ United States Seaboard—rail.....	230,279	37,325
Consumed Locally or Milled—rail.....	9,732,436	757,128
	<u>93,986,578</u>	<u>3,991,864</u>

CANADIAN SEABOARD

The Port of St. John, N.B., handled some 15,940,148 bushels including the carryover from the previous year. The shipments for overseas amounted to 15,915,245 bushels, while a small amount of 21,644 bushels was consumed locally.

A large quantity of Canadian grain is shipped overseas from Portland, Me. From returns received from elevators at this port 21,746,166 bushels were received and 21,432,545 bushels shipped out.

COMPARATIVE MOVEMENT OF CANADIAN GRAIN WITH OTHER CROP YEARS

The following statement shows the Handlings of Canadian grain at the Public Elevators in the East during the crop years 1918-19 to 1922-23 inclusive.

Crop Years	Total Handlings	Gross Shipments
1918-19.....	161,653,652	157,115,170
1919-20.....	172,444,510	167,528,921
1920-21.....	173,520,380	167,405,619
1921-22.....	190,865,253	187,977,270
1922-23.....	246,720,646	241,565,726
Increase 1922-23 over 1921-22.....	55,865,393	53,588,456

The Receipts and Shipments of Canadian Grain at the Public Elevators in the East during the Crop Year 1922-23 by grains were as follows:—

	Receipts			Shipments		
	Water	Rail	Total	Water	Rail	Total
Wheat.....	145,303,140	48,925,245	194,228,385	83,129,554	111,296,858	194,426,412
Oats.....	21,562,222	9,446,309	31,008,531	11,722,221	18,903,642	30,625,863
Barley.....	11,461,852	3,236,661	14,698,513	3,560,732	10,271,415	13,832,147
Flax.....	475,044	12,451	487,495	489,529	489,529
Rye.....	3,320,078	89,772	3,409,850	1,143,787	1,047,988	2,191,775
Total.....	<u>182,122,336</u>	<u>61,710,438</u>	<u>243,832,774</u>	<u>100,045,823</u>	<u>141,519,903</u>	<u>241,565,726</u>

MOVEMENT OF UNITED STATES GRAIN THROUGH CANADA, CROP YEAR, 1922-3

On page 24 is a map showing graphically the flow of United States grain through Canada. The harvests are earlier in the United States than in Canada and therefore the movement of this grain is well under way before the peak is reached in the handling of Canadian grain. The largest amounts of United States grain received by water come in during the months of August, September and October. The rail movement to the St. Lawrence and Seaboard ports is practically continuous throughout the year.

The movement of United States grain through Canada during the crop year September 1, 1922, to August 31, 1923, shows total handlings of United States grain in Canadian Public Elevators in the East of 118,930,884 bushels. It must be remembered that a large part of this grain was handled twice, first on its entry at the lake ports and secondly when finally shipped out, and as a result appears twice in the record. The grain finally re-exported from Canadian ports of exit amounted to 55,313,235 bushels.

GEORGIAN BAY PORTS

The total amount of United States grain received at the above ports during the crop year 1922-23 amounted to 38,818,915 bushels which with the carryover from the previous year of 1,712,433 bushels makes a total of 40,531,208 bushels handled at these ports. The amount received by each individual Georgian Bay port was as follows:—

	Bush.
Port McNicoll.....	16,093,074
Depot Harbour.....	9,643,258
Tiffin.....	8,522,837
Collingwood.....	1,844,981
Midland.....	1,463,711
Goderich.....	1,251,054

The shipments of this grain from these ports were by rail and amounted to 39,636,890 bushels. The largest quantity was forwarded to Montreal, the amount being 24,194,380 bushels. The destinations of the balance were as follows:—

	Bush.
To Canadian Seaboard.....	4,760,380
" Other Canadian Points.....	1,183,911
" United States Seaboard.....	3,266,060
" Other United States Points.....	6,232,041

THE LOWER LAKE POOL

The amount received at Port Colborne was 16,165,830 bushels all coming in by vessel. This with the small amount on hand, 180,900 bushels, makes up the total quantity of United States grain handled at this point, 16,346,730 bushels. The shipments were practically all by water amounting to 16,191,921 bushels destined to Montreal. A small quantity of 38,075 bushels was forwarded by rail to the same destination.

ST. LAWRENCE PORTS POOL

According to the returns from the elevators at Montreal, the amount of United States grain received was 25,128,467 bushels by vessel and 29,254,252 bushels by rail. These amounts together with the carry over from the previous year of 3,771,984 bushels make the total amount for disposition of 58,154,703 bushels. It will be noted that the total receipts at Montreal do not agree with the water shipments from Port Colborne or the rail shipments from Georgian Bay Ports by 8,936,546 and 5,059,872 bushels respectively. This is accounted for by direct shipments from United States ports to Montreal.

The largest movement of this grain out of Montreal is by vessel to the United Kingdom and other overseas countries, the amount being 52,378,774 bushels, which, joined with 351,581 bushels from Quebec, make a total re-export via St. Lawrence Ports of 52,730,355 bushels.

An analysis of the rail shipments from Montreal shows that the small quantity of 552,331 bushels went to the United States Seaboard. 468,145 bushels moved to other Canadian Points and 66,866 bushels to the Canadian Seaboard. An amount of 686,553 bushels was shipped out of the elevators for local consumption.

The elevator situated in the city of Quebec received 364,304 bushels by rail and 791,684 bushels by water. This with the carry over of 165,577 bushels makes a total of 1,321,565 bushels handled. 351,581 bushels were shipped out by water as above, rail shipments to other Canadian points amounted to 248,393 bushels and 215,862 bushels were consumed locally.

CANADIAN SEABOARD

The total receipts at St. John, N.B., which was the only Canadian Seaboard port handling United States grain, amounted to 2,586,578 bushels. The amounts shipped from Georgian Bay ports and Montreal to the Canadian Seaboard were shown as 3,332,926 bushels. This exceeds the receipts at St. John by 1,746,548 bushels. No doubt some of the grain designated "Canadian Seaboard" should have been "Other Canadian Points." The shipments amounted to 2,582,880 bushels to United Kingdom and other Overseas Countries. This amount added to 52,730,355 bushels re-exported from St. Lawrence ports makes a total overseas movement of 55,313,235 bushels.

COMPARATIVE MOVEMENT WITH OTHER CROP YEARS

The following table shows the handlings of United States grain at the Public Elevators in the East during the crop years 1918-19 to 1922-23 inclusive.

Crop Year	Total Handlings	Gross Shipments
1918-19.....	83,339,773	82,720,191
1919-20.....	35,430,074	33,573,529
1920-21.....	100,499,124	89,502,215
1921-22.....	195,223,119	189,392,172
1922-23.....	118,930,924	113,419,471
Decrease 1922-23 from 1921-22.....	76,282,195	75,972,701

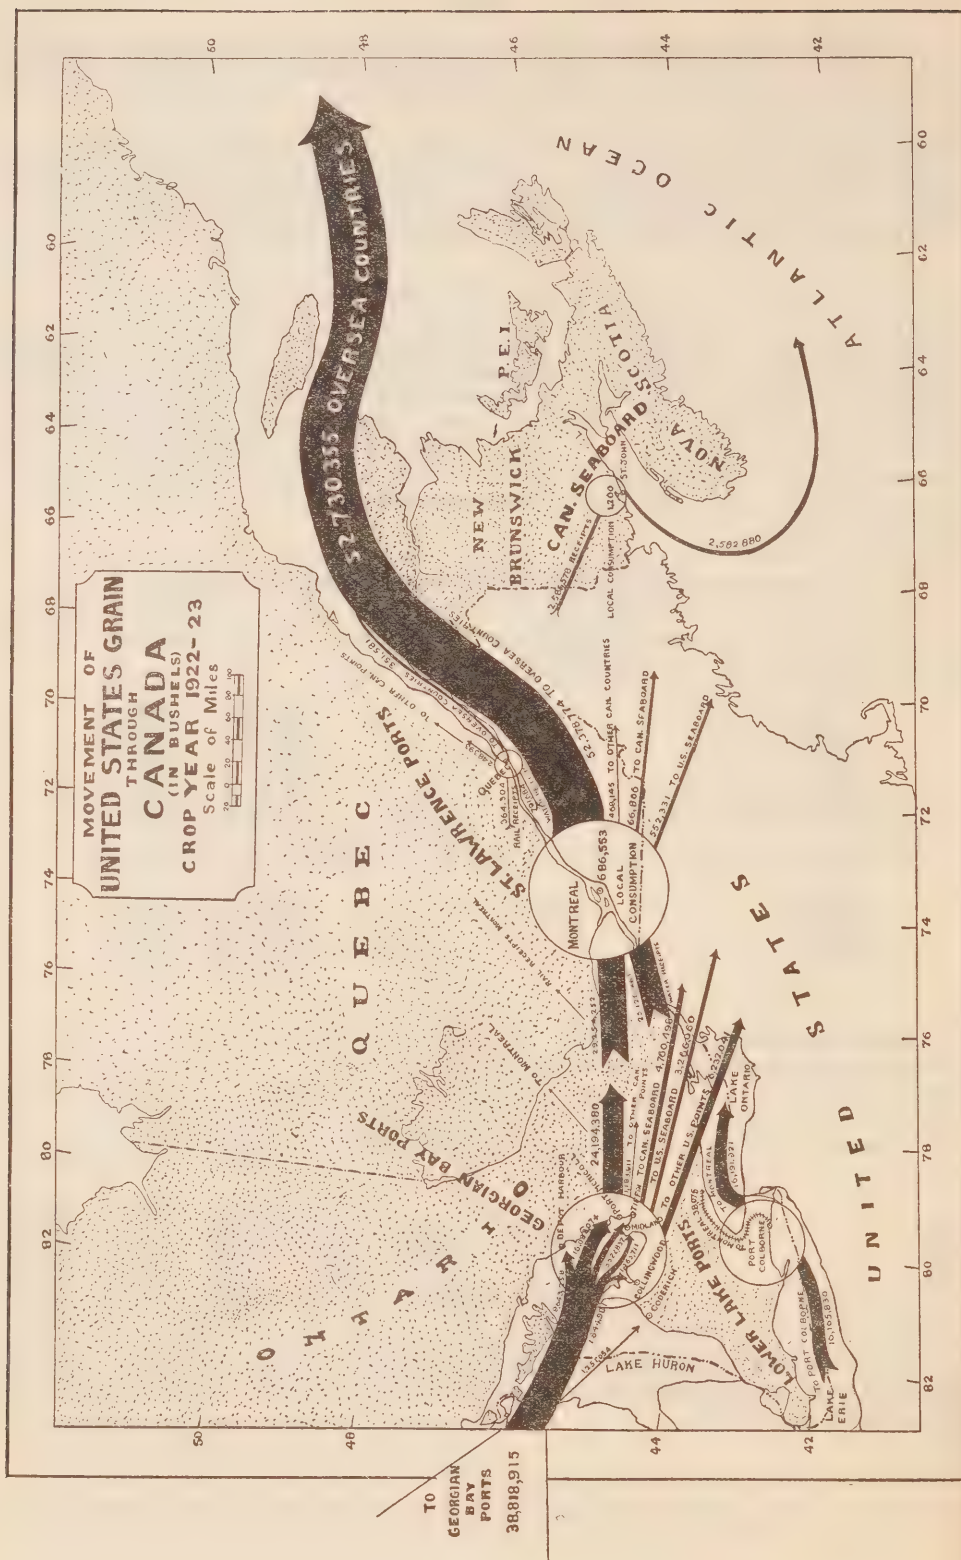

The overseas movement shows a decrease at each of the Canadian Seaboard ports.

Ports	1921-22 Bush.	1922-23 Bush.
Montreal.....	81,507,094	52,378,774
Quebec.....	3,243,782	351,581
St. John.....	4,822,353	2,582,880
Total.....	89,573,229	55,313,235

Receipts and shipments of United States grain at Canadian Public Elevators in the East during the crop year 1922-23 by grains were as follows:—

	Receipts			Shipments		
	Water	Rail	Total	Water	Rail	Total
	Bush.	Bush.	Bush.	Bush.	Bush.	Bush.
Wheat.....	40,234,087	13,251,454	53,485,441	39,112,573	13,934,489	53,097,062
Corn.....	22,037,528	9,528,372	31,565,900	16,201,331	17,148,076	33,350,007
Rye.....	17,684,842	9,394,333	27,079,175	16,122,976	9,244,865	25,367,841
Oats.....	948,439	30,975	979,414	67,676	1,536,885	1,604,561
Total.....	80,904,896	32,205,134	113,110,030	71,505,156	41,914,315	113,419,471

No United States barley was handled in these elevators during the past year. Corn had previously been the chief United States grain shipped through Canada. During this year corn has given place to wheat.

FLOUR MILLING IN CANADA, CROP YEAR 1922-3

Flour and grist milling in Canada in 1922 represented a capital investment of \$67,985,806 in 1,364 plants, with a total daily capacity of 134,125 barrels of flour, distributed by provinces as follows:—

Province	Number of mills	Capacity of Flour Mills in barrels per diem
Prince Edward Island.....	28	912
Nova Scotia.....	30	897
New Brunswick.....	44	2,149
Quebec.....	449	26,068
Ontario.....	660	71,444
Manitoba.....	39	12,060
Saskatchewan.....	54	8,067
Alberta.....	53	11,475
British Columbia.....	7	1,053

Statistics as to mill grindings in Canada, by grains, provinces and inspection divisions, by months, during the crop year 1922-3, are shown in table 94, while products produced therefrom are covered in table 95. Total grindings during the crop year were as follows:—

	Bush.
Wheat.....	85,258,682
Oats.....	9,374,317
Barley.....	856,859
Corn.....	1,626,161
Other grains—including mixed grain.....	10,318,119

Total flour produced amounted to 19,436,775 barrels, shorts and middlings to 368,598 tons, bran 282,702 tons, oatmeal 14,947,367 pounds and rolled oats 89,906,184 pounds.

Other principal statistics of the industry, by provinces, for the calendar year 1922, may be summarized as follows:—

PRINCIPAL STATISTICS OF FLOUR, GRIST AND CHOPPING MILLS, BY PROVINCES, 1922

	Number of Establishments	Capital	Employees	Salaries and Wages	Raw Materials Used	Value of Products
		\$	No.	\$	\$	\$
CANADA.....	1,364	68,453,886	6,757	7,490,369	136,687,078	166,881,455
Prince Edward Island.....	28	192,228	31	17,888	278,935	361,739
Nova Scotia.....	30	296,906	46	34,994	383,007	524,755
New Brunswick.....	44	310,112	74	53,859	826,898	1,021,727
Quebec.....	449	14,300,475	1,228	1,124,289	24,401,706	29,286,355

Alberta.....	53	6,590,267	660	828,216	9,826,930	12,677,672
British Columbia.....	7	1,479,971	162	210,100	1,271,941	1,770,285

CAPITAL INVESTMENT

The amount of capital represented in the industry as a whole in 1922, shows an increase of \$6,626,574, when compared with 1921. A table showing the capital invested by items and by provinces is appended.

CAPITAL INVESTED IN THE FLOUR AND GRIST MILL INDUSTRY BY ITEMS AND PROVINCES, 1922

	Land, buildings and fixtures	Machinery and tools	Materials on hand stock in process, etc.	Cash, trading and operating accounts, etc.	Total Capital	Total capital for chopping mills	Grand Total Capital for all Mills

EXPORTS

Exports of wheat flour during the crop year 1922-23 amounted to 11,069,054 barrels, of which 4,697,745 barrels were shipped to the United Kingdom, 432,607 barrels to the United States and 5,938,702 barrels to other countries. The total value of flour exported amounted to \$62,891,156. During the previous crop year exports of flour amounted to 7,878,589 barrels valued at \$50,634,601.

Of the exports of 10,636,447 barrels of flour to the United Kingdom and countries other than the United States, 6,406,991 barrels were shipped via Canadian ports and 4,229,456 via United States ports.

Converting to a wheat basis at the rate of $4\frac{1}{2}$ bushels of wheat per barrel of flour, combined exports of wheat and wheat flour during the crop year 1922-23 amounted to 279,492,557 bushels, with a value of \$326,710,586, as compared with 194,003,407 bushels valued at \$246,803,372 during the crop year 1921-22. Of the combined exports of wheat and wheat flour, 195,151,346 bushels were shipped to the United Kingdom, 14,882,780 bushels to the United States and 69,458,431 bushels to other countries. Of the exports overseas 115,706,130 bushels were shipped via Canadian ports and 148,903,647 bushels via United States ports.

SUMMARY

The following tables show the amount of wheat ground, wheat flour produced, and wheat flour exported by months during the crop year, 1922-23, with supplementary figures for the calendar year 1923.

CROP YEAR 1922-23

Month	Wheat Ground	Wheat Flour Produced	Wheat Flour Exported
	Bush.	Brls.	Brls.

SUMMARY OF DISTRIBUTION BY DIVISIONS

TABLE No. 77.—Summary of Distribution of Grain in Western Inspection Division, during the Crop Year 1922-23

	Wheat	Oats	Barley	Flax	Rye
	Bush.	Bush.	Bush.	Bush.	Bush.
1. On hand Sept. 1, 1922—					
In farmers' hands.....	1,767,000	7,921,000	426,000	2,600	56,400
In country elevators.....	4,657,202	1,461,009	768,951	89,620	753,030
In interior terminals.....	88,082	49,257	5,999	171	2,917
In terminal elevators.....	2,839,631	486,715	273,100	157,756	609,171
In private terminal elevators.....	1,755,722	336,207	124,878	32,997	176,691
In flour mills.....	1,679,395	163,428	7,902		
Total.....	12,787,032	10,417,616	1,606,830	283,144	1,598,209
2. Crop 1922.....	376,261,395	292,673,090	53,884,675	4,902,444	29,571,018
3. Shipped in from U.S.A.....	212,781	1,946	83	74	1,174
4. Total annual stock (sum, 1, 2 and 3).....	389,261,208	303,092,652	55,491,588	5,185,662	31,170,401
5. Shipped out—					
To U.S.A.....	12,719,549	88,190	930,550	2,319,495	430,917
To United Kingdom.....	117,039,575	5,336,134	4,367,010		7,461,584
To other countries.....	11,073,964	62,537	449,547		1,462,256
To Eastern Division.....	130,405,958	29,132,331	11,283,273	1,513,722	2,626,288
Total.....	271,239,046	34,619,192	17,030,380	3,833,217	11,931,045
6. Milled consumption.....	20,099,188	3,510,031	373,819		14,488
Milled export.....	3,908,183	1,562,434			
7. Total disposed of commercially (sum of 5 and 6).....	295,246,417	39,691,717	17,404,199		11,995,533
8. Used for seed.....	37,995,560	19,975,290	4,380,942	310,177	1,966,648
9. In store, Aug. 31, 1923—					
In farmers' hands.....	461,000	7,996,000	850,000		20,000
In country elevators.....	2,376,734	1,418,017	434,658	38,416	288,574
In interior terminals.....	13,821	177,705	1,604	1,462	8,740
In Vancouver Harbour Commissioner's Elevator.....	115,065	4,194			
In private terminal elevators.....	442,516	304,384	104,737	40,447	197,435
In public terminal elevators.....	1,043,509	210,807	199,658	109,420	797,563
In flour mills.....	949,781	441,461	12,212		
Total.....	5,402,426	10,552,568	1,602,869	189,745	1,312,312
10. Total accounted for (sum 7, 8 and 9).....	338,644,403	70,219,575	23,388,010		15,274,493
11. Loss in cleaning.....	8,465,881	321,940	711,277	575,057	550,021
12. Grain not merchantable.....	9,222,000	23,039,000	1,616,540	147,073	887,130
13. Balance—fed on farms or otherwise consumed in Western Inspection Division and moved out of Division through other channels.....	32,928,924	209,512,137	29,775,761		14,458,757

PUBLICATIONS OF THE CANADIAN BUREAU OF STATISTICS RE GRAIN TRADE, ETC.

- (1) Monthly Bulletin of Agricultural Statistics, compiled in co-operation with Provincial Departments of Agriculture, recording general statistics of conditions prevailing from month to month, with special references to acreages, prices, wages, etc., etc. The September, November and December issues contain the official annual estimates of the crop.
- (2) An annual report on the Grain Trade of Canada, showing the general grain throughout Canada from the farm to final market and in relation to the grain trade world.
- (3) A weekly statement showing stocks of grain in store, receipts and shipments at country elevators, interior terminal elevators, public and private terminal elevators in the Western Inspection Division, and at public elevators in the East, together with a statement showing stocks of Canadian grain at United States Lake and Atlantic ports.
- (4) Monthly supplements are added to the weekly grain statistics mentioned above, showing exports of grain and principal grain products by ports of exit and by shipping routes, together with inspections by months in both the Western and Eastern inspection divisions.
- (5) A monthly statement showing grain ground and products produced by merchant and customs mills in Canada.
- (6) An annual report on the Flour Milling Industry.
- (7) The monthly and annual trade statistics of the Bureau contain full details of the imports and exports of grain, flour, etc., whilst canal statistics and general transportation statistics include a full treatment of grain traffic by rail and water. Grain and flour prices are comprehensively covered in the monthly and annual reports on prices of the Internal Trade Branch.

GRAIN STATISTICS, 1924.

The present report on the Grain Trade of Canada was compiled in the Internal Trade Branch of the Dominion Bureau of Statistics in collaboration with the Board of Grain Commissioners for Canada.

The report has been prepared by Mr. W. Dougan under the supervision of Mr. F. J. Horning, B.A., F.S.S., Chief of the Internal Trade Branch of the Bureau.

Statistics are presented showing in detail the various channels and markets through which the grain passes from the farm to its final destination. The domestic movement of the grain is covered to show the production, inspection and handlings of grain at country, interior terminal, public terminal and private terminal elevators in the Western Inspection Division (comprising Fort William and Port Arthur and all territory west thereof) and at public elevators in the East. Handlings of United States grain in the Eastern elevators and of Canadian grain at United States Atlantic ports are also covered. Records of prices at representative markets, freight rates and insurance charges are also tabulated. Comprehensive data for countries other than Canada bring the grain and cereal resources of the world into review.

Owing to the important development of Vancouver as a grain shipping point, statistics as to the movement through this port have been extended to cover, so far as possible, the same features as are covered concerning the movement to the Head of the Lakes.

During the past few years, the movement of new grain has begun in August, somewhat earlier than was formerly the case. For this reason the question of the crop year, which formerly ended August 31st, was taken into consideration at a conference of officials of the Dominion and Provincial Departments of Agriculture and the Dominion Bureau of Statistics, held in January, 1924, at which the whole subject of agricultural statistics was reviewed. It was decided at this conference to change the date of the crop year in Canada to end July 31st. This brings the Canadian crop year into conformity with the international crop year adopted by the International Institute of Agriculture. This change was also approved by resolution of the Board of Grain Commissioners for Canada. Tables in the present report are therefore shown for the period ended July 31, 1924, with supplementary data for August so that a full twelve months' period is covered. Data included in the next report will cover the crop year August 1, 1924, to July 31, 1925.

An important portion of the data has been supplied by Mr. E. A. Ursell, Statistician of the Board of Grain Commissioners for Canada. Material relating to international grain production and trade is based upon the statistics of the International Institute of Agriculture and other official sources. The Board of Railway Commissioners for Canada has supplied the information relating to railway freight rates. The cordial thanks of the Bureau are tendered to the several departments co-operating and to elevator and other officials who have also assisted.

R. H. COATS,
Dominion Statistician.

DOMINION BUREAU OF STATISTICS,
OTTAWA, April 15, 1925.

ERRATUM

Exports of Rye in August, 1924, amounting to 6,792 bushels, wrongly shown as Flax in Tables 78 and 79, pages 123 and 124. Total exports of Rye should read 1,975,537 and 2,268,386 bushels respectively.

MOVEMENT OF CANADIAN WHEAT, CROP YEAR 1923-24

Canada's wheat crop for 1923 was the largest in its history. The production amounted to 474,199,000 bushels, exceeding the previous crop by 74,412,600 bushels. The Western Inspection Division produced 453,396,446 bushels, an increase of over 77,000,000 bushels as compared with the 1922 crop. Production in Eastern Canada showed a small falling off.

Inspection returns for the year showed a slight reduction in the percentage grading within contract grades. Some 86 per cent of the spring wheat crop graded No. 3 Northern and better compared with 92 per cent for the previous year. The following statement shows the total number of cars inspected with the percentage grading within contract grades for the crop years 1915-16 and 1919-20 to 1923-24.

Crop year ended August 31	Total number of cars inspected*	Rated Grading No. 3 and over
1915-16.....	281,279	80.3 %
1919-20.....	100,014	72.7 %
1920-21.....	149,669	86.3 %
1921-22.....	181,623	75.2 %
1922-23.....	228,611	92.1 %
1923-24.....	294,468	86.0 %

*Exclusive of winter wheat.

A total of 196,980 cars were inspected during the four months ended December 1923 compared with 168,160 cars during the same period in 1922. The number of cars of the 1923 crop inspected in August was only 1,347, while for the same month in 1922 there were 3,293 cars. During September 33,991 cars were inspected compared with 39,323 for the same month of the previous year. The remaining months of the crop year show large increases over the previous year with the exception of April and August 1924. The largest monthly increase took place in December 1923 when 21,378 cars were inspected.

Inspections by months for the crop years 1922-23 and 1923-24 were as follows:—

Month	Crop Year 1922-23	Crop Year 1923-24	Increase
Number of cars			
September.....	39,323	33,991	
October.....	64,844	57,638	
November.....	47,251	57,331	
December.....	26,642	48,020	
Total four months.....	168,060	196,980	28,920
January.....	12,081	15,386	
February.....	4,638	13,763	
March.....	9,540	11,806	
April.....	10,224	9,634	
May.....	8,327	15,720	
June.....	7,820	19,528	
July.....	4,940	9,867	
August.....	3,029	1,809	
Total eight months.....	60,599	97,513	36,914
Grand Total.....	228,659	294,493	65,834

During the first four months of the crop year 1923-24 the number of cars of wheat unloaded at the Head of the Lakes was 165,474, the remaining eight months handling 60,073 cars. Last year the unloadings for the same periods were 163,995 cars and 53,352 cars respectively. At Vancouver, B.C., the number of cars received during the crop year was 37,031.

The vessel shipments from Fort William and Port Arthur for the period from September 1 to the close of navigation 1923 compared with the same period last year were as follows:—

	1922 Bush.	1923 Bush.	Increase
To Canadian Ports.....	65,191,491	75,270,362	
United States Ports.....	101,012,105	105,913,527	
Europe (Direct).....		222,143	
Total.....	166,203,596	181,406,032	15,202,436

During the period from the opening of navigation to August 31, 1923 and 1924.

	1923 Bush.	1924 Bush.	Increase
To Canadian Ports.....	43,914,080	57,653,555	
United States Ports.....	19,059,243	44,565,437	
Total.....	62,973,323	102,218,992	39,245,669

From September to May of the crop year the average price of No. 1 Northern Wheat did not go above \$1.00 except in September when it rose to \$1.06. During the remaining months average prices ranged from 93·2c. to 99·7c. From May average prices increased from \$1.04 and steadily advanced to \$1.43 in August.

The Western wheat crop amounted to 453,396,446 bushels. The carry-over from the previous year of 5,402,426 bushels together with a small import of wheat and wheat flour from the United States of 188,316 bushels make a total quantity of 458,987,188 bushels available for distribution. Of this amount 363,074,083 bushels were disposed of commercially. The major part consisted of exports direct from the Western Division and shipments into the Eastern Division. Details of commercial shipments with comparative figures for the previous two crop years are—

	1921-22 Bush.	1922-23 Bush.	1923-24 Bush.
Direct Exports—			
To United States.....	15,808,860	12,719,549	21,208,797
To United Kingdom.....	75,014,769	117,039,575	153,100,850
To Other Countries.....	18,744,302	11,073,964	30,245,263
Total Exports.....	109,567,931	140,833,088	204,554,910
Shipments to the Eastern Inspection Division.....	86,677,294	130,405,958	140,776,147
Milled for home consumption.....	18,333,400	20,099,188	11,988,180
Milled for export.....	2,849,760	3,908,185	5,780,308
Total.....	217,428,385	295,246,417	363,099,545

The amount required for seed amounted to 36,950,100 bushels, while the amount in the elevators, flour mills and farmers' hands at the end of the crop year was 16,367,642 bushels.

Inspections totalled 391,274,959 bushels, or 86·3 per cent of the crop. The receipts at the Head of the Lakes were 296,694,136 bushels. 807,747 bushels were shipped by rail to the East without touching the Head of the Lakes (via Armstrong, Ont.), 7,807,904 bushels were shipped by rail from Fort William and Port Arthur, including the amount ground at Fort William. Direct shipments, other than via Armstrong, amounted to 6,236,736 bushels, making a total all-rail movement eastward from the Western Division of 7,044,483 bushels.

The increase in the wheat crop of the Western provinces was reflected in marketings and shipments as is shown in the following summaries:

Lake Shipments	Crop Year 1922-23	Crop Year 1923-24	Increase	Per cent of increase
	Bush.	Bush.	Bush.	Bush.
Canadian Ports.....	109,105,570	132,823,120	23,717,550	21·74

To Europe Direct.....		222,143	222,143
Total.....	229,176,919	283,625,022	54,448,103	23·76

(*Including 75,201 bushels shipped direct to New York).

Rail Movement	Crop Year 1922-23	Crop Year 1923-24	+ Increase — Decrease
	Bush.	Bush.	Bush.
To Canadian Seaboard, Eastern.....	5,274,452	935,905	— 4,338,547
To Canadian Domestic, Eastern.....	10,383,833	5,624,323	— 4,759,510
To United States Seaboard.....	4,553,458	396,726	— 4,156,732
To United States Domestic Ports.....	149,789	87,529	— 62,260
Total.....	20,361,532	7,044,483	— 13,317,049

No shipments of bonded Canadian wheat by water were made from Duluth to Canadian ports, but 704,655 bushels were shipped to United States ports.

The elevator returns in the Eastern Division show the amount of wheat received at Georgian Bay ports and Goderich amounted to 61,963,858 bushels. The shipments by rail amounted to 61,459,632 bushels and were distributed as follows:—To Montreal 18,364,614 bushels, Canadian seaboard 14,351,627 bushels, other Canadian points 4,234,430 bushels, United States seaboard 9,696,788 bushels, other United States points 14,352 bushels, while the amount consumed or ground locally was 14,787,821 bushels. The water receipts at Port Colborne and Kingston amounted to 61,954,459 bushels, an increase over the previous year of 18,614,465 bushels. Transshipments to Montreal were 46,631,935 bushels. This, together with the amount of 7,473,341 bushels shipped direct from the Head of the Lakes, makes a total receipt at Montreal of 54,105,276 bushels. Two small water shipments were made from Kingston to other Canadian ports of 843 bushels and 679 bushels to Canadian seaboard. The elevator returns at Montreal and Quebec show water receipts of 59,605,877 bushels and rail receipts of 29,619,883 bushels, which make the total handled 89,225,760 bushels. Receipts at Montreal included 13,868,567 bushels shipped by water from Buffalo.

Rail shipments from Port Colborne and Kingston were as follows:—To Montreal 48,525 bushels; Canadian Seaboard 314,297 bushels; Local 11,657,437 bushels, and other Canadian points 2,574,209 bushels; a total of 14,594,468 bushels.

Shipments by water from Fort William and Port Arthur to United States Lake Ports with comparative figures for the previous year were as follows:—

Destination	1922-23 Bush.	1923-24 Bush.
Duluth-Superior.....	1,773,677

Buffalo.....	96,514,084	126,515,430
Cleveland.....	278,555
New York.....	75,201
Other United States Ports.....	80,972
Total.....	120,071,349	150,579,759

According to customs figures 128,493,332, bushels and 1,043,276 bushels were exported from Fort William and Port Arthur to United Kingdom and other countries respectively. These shipments went by way of Buffalo and other United States Lakeports and United States Atlantic Seaboard ports. Export figures show that 20,880,479 bushels were exported direct to the United States for consumption.

The crop in the Eastern Division amounted to 20,802,554 bushels, a decrease of 2,722,451 bushels. The quantity carried over was 3,529,692 bushels; imports from United States were 235,243 bushels. The receipts of wheat from the Western Division were 140,750,685 bushels. This makes a total stock of 165,318,174 bushels for distribution in the Eastern Division. The amount disposed of commercially was 162,345,782 bushels, exports amounting to 84,635,151 bushels, 46,976,282 bushels to the United Kingdom, 37,547,424 bushels to other countries, and 111,445, bushels to United States. Wheat ground in the Eastern Division for consumption in Canada was 29,532,150 bushels and for export 48,178,481 bushels, a total of 77,710,631 bushels. Seed requirements were 1,647,392 bushels, and the carry-over 9,899,323 bushels.

The Canadian Eastern Seaboard ports show a net increase of 3,935,977 bushels in exports during the crop year over the previous year, as below.

—	1922-23	1923-24	+ Increases — Decreases	Per cent of increase	Per cent of total export
Montreal.....	54,376,331	61,259,032	+ 6,882,701	+ 12.66	21.18

Total via St. Lawrence Ports.....	57,030,848	63,568,444	+ 6,537,596	+ 11.46	22.08
Halifax, N.S.....	300	302	2
St. John, N.B.....	12,013,852	9,412,231	— 2,601,621	— 21.66	3.25
Total.....	69,045,000	72,980,977	+ 3,935,977	+ 5.7	25.34

An important development was the heavy export of wheat from Vancouver, B.C. From an export of 17,829,687 bushels during the previous crop year, shipments increased to 53,809,505 bushels, a gain of 35,970,818 bushels, or 201.75 per cent. Comparative figures for previous years follow:—

Crop Year	To United States	To United Kingdom	To Other Countries	Total
	Bush.	Bush.	Bush.	Bush.
1918-19.....	7,752	414,571		422,323
1919-20.....	2			2
1920-21.....	106,419	466,328		572,747
1921-22.....	6,667	4,317,437	3,519,734	7,843,838
1922-23.....	19	10,506,635	7,323,033	17,829,687
1923-24.....		24,607,518	29,201,987	53,809,505

Of the total export of wheat from Canada 289,190,061 bushels, Vancouver B.C., exported 53,809,505 bushels, or 18.6 per cent. The total export of wheat from Canadian Seaboard ports during the crop year 1923-24 was 126,790,482 bushels.

Exports from the Eastern Division to the United States for consumption were 111,445 bushels. The quantity exported from United States Atlantic Seaboard ports to the United Kingdom was 11,466,666 bushels, to other countries 76,063 bushels. These exports left Canada through the following Quebec and Ontario ports of exit:—Coaticook 7,977,292 bushels, St. Johns, Que., 2,012,477 bushels, Abercorn 688,065 bushels, Bridgeburg 390,300 bushels, Niagara Falls 363,043 bushels, Prescott 111,532 bushels. Shipments via Portland were 8,262,548 bushels.

Exports by countries of destination show that 200,077,132 bushels went to the United Kingdom and 21,320,242 bushels to United States, to other Countries in the Empire 2,494,295 bushels and other foreign countries 65,298,392 bushels. Full details of exports by countries of destination are shown in table 00. An important feature was the increased amount shipped to China and Japan.

Comparative figures of export shipments overseas via Canadian and United States Seaboard ports are as follows:—

	Via Canadian Ports	Via United States Ports	Total
1918-19.....	35,292,000	19,102,080	54,394,080
1919-20.....	48,345,771	13,023,281	61,369,052
1920-21.....	32,767,225	54,193,010	86,960,235
1921-22.....	42,572,122	100,009,466	142,581,588
1922-23.....	86,874,671	129,871,095	216,745,766
1923-24.....	126,790,482	141,079,337	267,869,819

United States Department of Commerce returns show that 128,760,434 bushels of Canadian wheat were cleared for export from the United States to overseas countries, compared with 115,799,903 bushels last crop year. New York exported the largest quantity, viz. 63,091,140 bushels. Philadelphia handled 23,224,838 bushels, Baltimore 14,989,417 bushels, Norfolk, Va., 12,568,440 bushels, Portland 7,713,330 bushels, and Boston 7,173,269 bushels.

Complete data showing the movement of wheat and other grains by inspection divisions and for Canada as a whole are contained in tables 73, 74 and 75. Summaries of the handling of grain by the different classes of elevators—country, interior terminal, public terminal, private terminal and public elevators in the East—show the movement through each particular grain centre in Canada during the crop year. A more detailed study of the movement of wheat and other grains can be made from these summaries.

MOVEMENT OF CANADIAN OATS, CROP YEAR 1923-24

More oats are produced in Canada than all the other grains (wheat, barley, flax, and rye) combined. The crop of 1923 was 563,997,500 bushels, an increase of 72,758,500 bushels over the crop of 1922. The Western Division produced 395,242,597 bushels. The quantity on hand from the previous year amounted to 10,552,568 bushels, and imports from the United States to 1,317 bushels, making a total of 405,796,482 bushels available for distribution from the Western Division. Only 69,278,103 bushels were disposed of commercially, 16,155,734 bushels being exported as grain, 45,889,562 bushels were shipped to the Eastern Division, 7,158,747 bushels were milled for consumption in the West and 74,060 bushels exported in the form of oatmeal and rolled oats. The seed requirements were 23,202,097 bushels, and the quantity in store in the elevators and farmers' hands at the end of the crop year amounted to 33,042,408 bushels.

A total of 125,522,608 bushels are accounted for, and of this amount 84,354,889 bushels were inspected, or 21·3 per cent of the crop. The small proportion inspected and entering commercial markets is due to the large amounts fed directly on the farm. The amount of oats received at the elevators at Fort William and Port Arthur was 58,272,344 bushels. Water shipments from the Head of the Lakes were 46,199,598 bushels (an increase over the previous year of 26,800,712 bushels), 32,306,500 bushels going to Canadian ports and 13,733,099 bushels to United States ports. There were 4,042,063 bushels shipped by rail from elevators at Fort William and Port Arthur. This includes the amount milled at Fort William. 3,252,530 bushels were shipped all-rail via Armstrong, Ont., making, with other direct shipments a total rail movement east of 10,416,927 bushels. Of the shipments from the Head of the Lakes to Canadian lake ports, Georgian Bay ports received 17,463,912 bushels and Goderich 6,237,481 bushels. The shipments from these points were by rail and amounted to 15,240,282 bushels and 5,857,842 bushels respectively.

The water receipts at Port Colborne and Kingston amounted to 5,497,216 bushels, and rail 285,509 bushels. The shipments by water were 3,859,187 bushels, 3,758,975 bushels going to Montreal. The rail movement from these ports was 1,305,335 bushels, destined as follows: to Montreal 16,250 bushels; to Canadian Seaboard ports 290,402 bushels; local shipments 24,199 bushels; to other Canadian points 937,036 bushels; to United States points 37,448 bushels.

The water and rail shipments from Port Colborne to Montreal were 4,189,169 bushels, making the direct water movement of 3,324,550 bushels from the Head of the Lakes, the total shipped to Montreal of 7,513,719 bushels. The elevator returns at Montreal show that 6,619,818 bushels were received by water and 3,999,803 bushels by rail, a total of 10,619,621 bushels.

Exports from the Western Division to the United States were 1,175,913 bushels; 13,910,192 bushels to United Kingdom, to overseas countries 14,979,821 bushels, and 1,069,629 bushels to other countries. 13,347,263 bushels went out from Fort William and Port Arthur direct, while 1,632,543 bushels were exported from Vancouver and 15 bushels from Dawson.

The Eastern oat crop amounted to 168,754,903 bushels, a decrease of 29,811,007 bushels from the previous year. The amount shipped from the Western Division was 45,889,562 bushels, making, with a small import of 184,191 bushels and a carryover of 10,426,249 bushels, a total of 225,254,905 bushels for distribution. The amount milled in Eastern Canada for consumption was 303,816 bushels, and for export 5,170,910 bushels. The exports were 21,469,410 bushels, of which 3,991,964 bushels went to the United States for consumption, and of the remainder 14,064,628 bushels were exported to United Kingdom and 3,412,818 to other countries.

The Canadian Atlantic Seaboard Ports exports amounted to 13,967,844 bushels and exports via United States ports 3,509,602 bushels. Of the former amount 10,912,017 bushels were destined to the United Kingdom and 3,055,827 to other countries. The latter moved by rail

through inland ports of exit as follows: Coaticook 1,735,705; Niagara Falls 855,271; Bridgeburg 306,829; Prescott 303,301; Cornwall 99,943; St. Armand 63,533; St. John's, Que., 63,520; Abercorn 59,563 bushels and Athelston 21,937 bushels.

Seed requirements amounted to 13,026,125 bushels and at the end of the year 12,552,918 bushels were carried in store.

Shipments from the Head of the Lakes by water to Buffalo amounted to 13,678,099 bushels and New York 55,000 bushels, a total of 13,733,099 bushels. 3,509,602 bushels were shipped by rail into United States destined overseas making a movement into that country of 17,242,701 bushels from the Eastern Pool. There was a small movement of oats by water from Buffalo to Montreal of 53,000 bushels. This with direct shipments from the Western Division show a total export into United States from Canada of 22,024,742 bushels of which 5,167,877 bushels were for consumption and 16,856,865 bushels for re-export from United States Atlantic Seaboard to Overseas Countries.

Exports of oats via Canadian Pacific Seaboard Ports amounted to 1,632,543 bushels, via Canadian Atlantic Seaboard Ports 13,967,844 bushels and via United States Seaboard Ports 16,856,865 bushels. The total export movement, including the small shipment via Dawson and exports to the United States for consumption, was 37,625,144 bushels, an increase of 14,063,974 bushels over the previous year.

Comparative figures of export shipments of oats via Canadian and United States Seaboard ports from 1919-20 to 1923-24 are as follows:—

Crop Year	Via Canadian Ports	Via United States Ports	Total
1919-20.....	3,427,156	5,802,538	9,229,694
1920-21.....	21,067,556	4,775,453	25,843,009
1921-22.....	14,833,364	10,083,835	24,917,199
1922-23.....	14,957,412	8,353,007	23,310,419
1923-24.....	15,600,402	16,856,865	32,457,267

Complete data showing the movement of oats by inspection divisions and for Canada as a whole are contained in tables 73, 74 and 75. Summaries are also shown in the report dealing with the handling of the grain by the several classes of elevators and centres throughout Canada.

BARLEY, FLAX AND RYE.

Details of the production and distribution of these grains are shown in tables 73, 74 and 75. As in the case of oats, the percentage of these grains exported is much smaller than in wheat, the bulk being consumed within the country.

MOVEMENT OF CANADIAN GRAIN THROUGH THE EASTERN DIVISION FOR THE CROP YEAR PERIOD 1923-24. (September 1 to July 31, 1924.)

A huge crop of grain was harvested in Western Canada during the past year. A large quantity of this was moved as grain through the elevators in the Eastern Division. The increase in the movement is reflected in the handlings of these elevators.

On the accompanying map on page 18 it has been endeavoured to show the receipts and distribution by groups of elevators. These are depicted as a series of pools to enable the reader to trace the movement of the grain. As it has been found impossible to give the name of each individual destination, the alternative of grouping the ports under the following headings: "To Canadian Seaboard," "Other Canadian Points," "United States Seaboard," "Other United States Points," has been used.

Public elevators in the East are licensed to handle western grain after it has been inspected, acting as transfer houses, and are situated at points on the Georgian Bay, Lower Lakes, St. Lawrence River and the Atlantic Seaboard. For convenience, Goderich has been included in the Georgian Bay ports.

The figures showing the detail of the movement are for the eleven months' period (September 1 to July 31) except for the following summary which shows amounts handled and shipped during the last five crop years comparatively.

COMPARATIVE MOVEMENT OF CANADIAN GRAIN WITH OTHER CROP YEARS

The following statement shows the Handlings of Canadian grain at the Public Elevators in the East during the crop years 1919-20 to 1923-24 inclusive.

Crop Years ending August 31	Total Handlings	Gross Shipments
1919-20.....	172,444,510	167,528,921
1920-21.....	173,520,380	167,405,619
1921-22.....	190,865,253	187,977,270
1922-23.....	246,720,646	241,565,726
1923-24.....	292,468,658	280,352,391
Increase 1923-24 over 1922-23.....	45,748,012	38,786,665

GEORGIAN BAY PORTS POOL

The following table shows that there was a total of 87,306,129 bushels received at the Georgian Bay elevators. This amount does not include a carryover of 1,168,933 bushels from the previous crop year which makes a total handled of 88,475,062 bushels. The amounts received by individual ports were as follows:

	Bushels
Port McNicoll.....	26,500,795
Tiffin.....	25,011,562
Goderich.....	19,719,292
Midland.....	13,406,573
Depot Harbour.....	2,667,907
Total.....	87,306,129

The shipments were by rail and amounted to 84,538,140 bushels. The large quantity of 22,202,836 bushels was consumed locally or milled in the pool. The balance was shipped out by rail and destined as follows:

	Bushels
To Montreal.....	21,509,391
Canadian Seaboard.....	19,113,550
Other Canadian Points.....	7,418,880
United States Seaboard.....	11,570,519
Other United States Points.....	2,722,964
Total.....	62,335,304

LOWER LAKE PORTS POOL

Port Colborne received 62,077,562 bushels and 379,164 bushels by water and rail respectively. Kingston also received small amounts of 654,995 bushels and 126,384 bushels by the same routes as Port Colborne. The combined carryover was 460,221 bushels, making a total amount available for distribution of 63,698,326 bushels. 46,324,627 bushels and 48,525 bushels were forwarded to Montreal from Port Colborne by vessel and rail respectively. No grain was shipped to Montreal from Kingston. The balance was distributed as follows:

	From Port Colborne		From Kingston		Total	
	Rail	Water	Rail	Water	Rail	Water
	Bush.	Bush.	Bush.	Bush.	Bush.	Bush.
To Canadian Seaboard.....	598,161	3,239	679	601,400	679
To other Canadian points.....	2,947,296	45,578	582,063	76,527	3,529,359	122,105
To United States Seaboard.....	3,083	3,083
To other United States points.....	34,365	34,365
Consumed locally and milled.....	10,497,410	69,869	10,567,279
Total.....	14,042,867	45,578	692,619	77,206	14,735,486	122,784

ST. LAWRENCE PORTS POOL

According to Montreal elevator returns some 60,638,802 bushels were received by vessel and 34,530,029 bushels by rail. Adding a carryover of 2,879,665 bushels the total Canadian grain for disposition amounted to 98,048,496 bushels.

The receipts at the Port of Quebec by vessel and rail amounted to 3,306,124 and 859,383 bushels respectively. The carryover was 172,613 bushels making the total handled 4,338,120 bushels.

The largest part of this grain was shipped to United Kingdom and other countries, the amount being 80,417,028 bushels from Montreal and 2,451,329 bushels from Quebec, making a total St. Lawrence River movement of 82,868,357 bushels. The disposal of the shipments was as follows:—

	Montreal	Quebec
	Bush.	Bush.
To United Kingdom and other countries—water.....	80,417,028	2,451,329
To Canadian Seaboard—rail.....	295,288
To United States Seaboard—rail.....	17,891
Consumed Locally or Milled—rail.....	12,736,014	1,477,268
Total.....	93,466,221	3,928,697

CANADIAN SEABOARD

The amount of Canadian grain handled by the Port St. John, N.B. was practically the same as in the previous year. The quantity received was 15,429,956 bushels, together with a carryover of 3,229 bushels, making the total handlings 15,429,956 bushels. This quantity was all received by rail. Shipments of 15,426,713 bushels were destined to United Kingdom and overseas countries, while a small amount of 1,854 bushels was consumed locally.

Portland, Me., received some 11,409,264 bushels of Canadian grain which was all shipped to overseas countries.

The receipts and shipments of Canadian grain at the public elevators in the east during the crop year period 1923-24 by grains were as follows:—

	Receipts			Shipments		
	Rail	Water	Total	Rail	Water	Total
	Bush.	Bush.	Bush.	Bush.	Bush.	Bush.
Wheat.....	166,091,922	39,014,744	205,106,666	82,164,613	116,839,101	199,003,714

MOVEMENT OF UNITED STATES GRAIN THROUGH CANADA (IN BUSHELS) 1923 - 1924

Scale of miles
0 50 100 150 200

MOVEMENT OF UNITED STATES GRAIN THROUGH CANADA, CROP YEAR PERIOD 1923-24.

(September 1 to July 31, 1924.)

The map on page 22 shows graphically the movement of United States grain from its receipt at a Canadian port to its final shipment from the St. Lawrence and Atlantic Seaboard. In describing this movement through the public elevators in the East it must be first stated that the bulk of the grain is handled twice, first on its entry at the lake ports and secondly when finally shipped out.

The amount of United States grain handled this year shows a decrease of 55,291,463 bushels from the quantity handled during the crop year 1922-23. This was due to the reduced production and exportation from the United States during the year. Another factor was the increased production of the Canadian crop.

As in the case of Canadian grain the period covered is for the eleven months (September 1 to July 31) except the following statement which shows the handlings for the last five crop years.

COMPARATIVE MOVEMENT WITH OTHER CROP YEARS

The following table shows the handlings of United States grain at the Public Elevators in the East during the crop years 1919-20 to 1923-24 inclusive.

Crop Year	Total Handlings Bush.	Gross Shipments Bush.
1919-20.....	35,430,074	33,573,529
1920-21.....	100,499,124	89,502,215
1921-22.....	195,223,119	189,392,172
1922-23.....	118,930,924	113,419,471
1923-24.....	63,639,461	58,150,718
Decrease 1923-24 from 1922-23.....	55,291,463	55,268,753

GEORGIAN BAY PORTS POOL

The receipts at the above ports amounted to 8,016,722 bushels to which must be added the carryover from the previous year of 894,422 bushels, making a total of 8,911,144 bushels. The amount received by individual elevators was as follows:—

	Bush.
Port McNicoll.....	486,442
Midland.....	378,787
Tiffin.....	564,358
Goderich.....	625,182
Collingwood.....	1,692,334
Depot Harbour.....	4,269,619
Total.....	8,016,722

The shipments of this grain were by rail and amounted to 8,140,741 bushels. In former years the bulk of this went to Montreal for shipment. During this crop year period the destination of 6,173,897 bushels of the above was "Other U.S. Points", while the balance was forwarded to the following destinations:—

	Bush.
To Montreal.....	529,442
To Canadian Seaboard.....	407,426
To Other Canadian Points.....	536,921
To United States Seaboard.....	387,514
Consumed locally.....	105,541
Total.....	1,966,844

LOWER LAKE PORTS POOL

Port Colborne was the only port in this pool handling United States grain and the quantity received was 15,332,883 bushels by vessel which with a small carryover of 116,734 bushels from the previous year, makes the total handled 15,449,617 bushels. The shipments to Montreal by vessel amounted to 15,096,466 bushels. There were no other shipments from this Port.

ST. LAWRENCE PORTS POOL

The elevator returns from Montreal show that 20,666,771 bushels were received by water and 1,140,678 bushels by rail. These amounts together with the carryover of 3,577,080 bushels make the total quantity handled 25,384,529 bushels. The water shipments from Port Colborne do not correspond with the water receipts at Montreal by 5,570,305 bushels, nor do the rail shipments agree with the rail receipts at Montreal by 611,236 bushels. This is accounted for by direct shipments from United States ports to Montreal.

Practically all this United States grain was shipped by vessel to the United Kingdom and other overseas countries, the amount being 22,680,517 bushels. This joined with an overseas shipment of 545,305 bushels from Quebec makes a total St. Lawrence River movement of 23,225,822 bushels. There was also a small amount of 465,023 bushels consumed locally.

At the Port of Quebec there was a large carryover of 505,732 bushels from the previous crop year. The rail and water receipts were 16,579 bushels and 350,652 bushels respectively making a total handled of 872,963 bushels. 545,305 bushels were shipped out by vessel as stated above, while 273,716 bushels were moved by rail to local points.

CANADIAN SEABOARD

The total receipts at the Port of St. John were 491,947 bushels, while the carryover was 2,502 bushels, making a total quantity of United States grain handled of 494,449 bushels. Shipments amounting to 491,947 bushels went to United Kingdom and other overseas countries. 2,502 bushels were shipped to local points. According to the figures from the Georgian Bay Ports 407,426 bushels were shipped to "Canadian Seaboard." This is 84,521 bushels less than the rail receipts at St. John, N.B. This is accounted for no doubt by some of the destinations being marked "other Canadian points" instead of "Canadian Seaboard." The amount forwarded overseas added to the quantity shipped via the St. Lawrence Ports, viz: 23,225,822 bushels, makes a total re-export of 23,717,767 bushels.

Receipts and shipments of United States grain at Canadian Public Elevators in the East during the crop year period September 1, 1923 to July 31, 1924, by grains were as follows:—

	Receipts			Shipments		
	Water	Rail	Total	Water	Rail	Total
	Bush.	Bush.	Bush.	Bush.	Bush.	Bush.
Wheat.....	23,922,918	302,157	24,225,075	25,767,188	488,201	26,255,389
Corn.....	1,692,862		1,692,862		1,641,290	1,641,290
Rye.....	13,770,010	1,192,337	14,962,347	12,912,075	1,559,442	14,471,517
Oats.....	4,981,238	154,710	5,135,948	134,972	5,193,049	5,328,021
Total.....	44,367,028	1,649,204	46,016,232	38,814,235	8,881,982	47,696,217

Wheat was the chief grain handled during the past period with rye second oats and corn following in the order named.

SHIPMENTS OF UNITED STATES GRAIN BY VESSEL DURING THE CROP YEARS 1919-20 TO 1923-24, BY EASTERN SEABOARD PORTS

Crop Year ended August 31	Montreal	Quebec	St. John, N.B.	Total

FLOUR MILLING IN CANADA, CROP YEAR 1923-24

Flour and grist milling in 1923 represented a capital investment of \$60,556,587 in 1,387 plants with a total daily capacity of 127,148 barrels of flour, distributed by provinces as follows:—

Province	Number of flour mills	Grist and feed mills	Total number of mills	Rolls Pr.	Stones Pr.	Capacity of flour mills in barrels per diem
CANADA.....	560	827	1,387	4,988	546	127,148
Prince Edward Island.....	18	7	25	76	22	674
Nova Scotia.....	27	3	30	82	35	1,285
New Brunswick.....	43	3	46	130	25	1,881
Quebec.....	141	295	436	809	361	22,371
Ontario.....	217	462	679	2,563	76	66,524
Manitoba.....	29	8	37	422	6	12,415
Saskatchewan.....	40	26	66	381	9	9,238
Alberta.....	38	23	61	471	6	11,707
British Columbia.....	7	7	54	6	1,053

Statistics as to mill grindings in Canada, by grains, and inspection divisions, by months during the crop year 1923-24 are shown in table 91, while products produced therefrom are covered in table 92. Total grindings during the crop year were as follows:—

	Bush.
Wheat.....	92,995,487
Oats.....	12,707,533
Barley.....	1,031,763
Corn.....	1,277,783
Other grains—including mixed grain.....	11,882,735

Total flour produced amounted to 20,845,308 barrels, shorts and middlings to 402,973 tons, bran 319,313 tons, oatmeal 1,488,529 pounds and rolled oats 46,207,233 pounds.

Other principal statistics of the industry, by provinces, for the calendar year 1923, may be summarized as follows:—

PRINCIPAL STATISTICS OF FLOUR AND FEED MILLS BY PROVINCES, 1923

EXPORTS

Exports of wheat flour during the crop year 1923-24 amounted to 11,990,842 barrels, of which 4,112,356 barrels were to the United Kingdom; 184,381 barrels to the United States; and 7,694,105 barrels to other countries. The total value of flour exported amounted to \$62,080,203. During the previous crop year, exports of flour amounted to 11,069,054 barrels, valued at \$62,891,156.

Of the exports of 11,806,461 barrels of flour to the United Kingdom and countries other than the United States, 6,420,379 barrels were shipped via Canadian ports and 5,386,082 via United States ports.

Converted to a wheat basis at the rate of $4\frac{1}{2}$ bushels of wheat per barrel of flour, combined exports of wheat and wheat flour during the crop year 1923-4 amounted to 343,148,851 bushels. with a total value of \$356,075,330, as compared with 279,492,557 bushels valued at \$326,710,586 during the crop year 1922-3. Of the combined exports of wheat and wheat flour, 218,582,734 bushels were shipped to the United Kingdom; 22,149,958 bushels to the United States and 102,416,159 bushels to other countries. Of the exports overseas 155,682,186 bushels were shipped via Canadian ports and 165,316,707 bushels via United States ports.

Exports of bran and shorts during the crop year 1923-4 amounted to 3,321,451 cwt. The major part of this, viz., 3,214,835 cwt. were shipped to the United States. Of this balance, 33,329 cwt. went to the United Kingdom and 73,287 cwt. to other countries.

Exports of oatmeal and rolled oats amounted to 936,602 cwt., of which 2,612 cwt. were shipped to the United States, 698,405 cwt. to the United Kingdom and 235,585 cwt. to other countries. Shipments via Canadian Seaboard ports totalled 688,812 cwt., while 245,178 cwt. were shipped via United States ports.

SUMMARY

The following tables show the amount of wheat ground, wheat flour produced, and wheat flour exported, by months, during the crop year 1923-4, with supplementary figures for the calendar year 1924:—

Crop Year 1923-24	Wheat Ground	Wheat Flour Produced	Wheat Flour Exported
	Bush.	Bbls.	Bbls.
September, 1923.....	6,592,445	1,469,637	456,479
October, 1923.....	10,313,022	2,317,253	1,155,274
November, 1923.....	10,429,208	2,340,402	1,357,310
December, 1923.....	8,152,182	1,822,152	1,390,242
January, 1924.....	8,486,432	1,901,849	1,052,259
February, 1924.....	8,048,053	1,807,571	1,091,942
March, 1924.....	7,654,982	1,720,930	1,397,810
April, 1924.....	6,493,249	1,458,252	889,654
May, 1924.....	8,245,411	1,858,018	1,057,487
June, 1924.....	6,208,833	1,387,063	903,212
July, 1924.....	6,042,484	1,351,469	612,960
August, 1924.....	6,329,186	1,410,712	626,213
Total year, 1923-24.....	92,995,487	20,845,308	11,990,842
